HANOVER, N. H.

CONCERT TOMORROW
Tech Show Organization to Give Program at Lowell at 8 O’clock P. M.
Lowell, Massachusetts, has been selected as the town to hear the Tech Show Orchestra tomorrow night. The concert will be given in Colonial Hall at 8 P. M. sharp.

The orchestra has been drilled very faithfully for some time, and the managers expect to put up an excellent performance. The program includes eleven numbers, divided about equally between orchestral and vocal selections.

A new conductor has recently been appointed in the person of Mr. Ousborne McCarthy, a master musician. Mr. McCarthy will have charge of the preliminary concerts, will get the music for the orchestra, and charge for publication, will drill the chorus in the show, and make the musical side of the show in general. Under his conductance the managers expect to stage the best show that has been put on the boards by Technology for many years as far as music is concerned.

As it is necessary for all Orchestra men to be at Lowell promptly, the following men will know their parts and be at the North Station in time to take the 6.03 P. M. train.

HARVARD UNION.
Professional Vaudeville Entertainmen Given.
Last evening, in the Harvard Union, a mixed of entertainment entirely new to the University in recent years, was presented in the living room. The entertainment took the form of a vaudeville show, similar to those with performances which are used to be exceedingly popular several years ago.

The program consisted of acts presented by professional thespians from various vaudeville circuits, and was made up of the following numbers:
The Troubadour Four, colored entertainers. Frank Buello, the dean of story tellers.
Little Jerry McCarthy, the original Red Box Mascotte, in popular songs.
S. Wilson Darby, prestidigитель.
Mr. Lowe, piano accompanies.

The attendance was gratifyingly large, and the performers were all highly successful in every respect.

PLANT TEST.
(Continued from Page 2.)
be seen in the center of the room, where several young gentlemen were located with the intention of keeping track of the performance of the engine under test. Here, it seemed, the trouble was to be found. For the young gentlemen were both discussing the question of whether “Why is why and why not?” In the latter part of the debate they would bury their faces in huge wedges of chocolate pie and seemed perfectly happy.

The poor old engine in the machine was growing under tremendous overloads with ever and anon a snort causing it to race before the governor came into operation, and made no doubt, to a flooring lights. Here certainly was the cause of the flickering lights. The search was practically ended. The representative turned to go, but as he rounded the corner of one of the dynasty he came so suddenly upon the two young men who were supposed to watch the condenser water that they had no time to put away their cards and clips. These two men did not have anything to do with the lights, but their actions serve to illustrate the general feeling of earnestness which characterized all college men when the professor’s back is turned.

Satisfied that he had discovered the trouble, and being assured that the test would be over by 8 A. M. tomorrow, the representative returned to the office.

It seems that each year Course II men run the lights and apparatus of the “Wells in this matter. It is a necessary part of our equipment for life and its problems, and for this reason we are all willing to allow one week of pleasure fooling with our expensive apparatus. The young gentlemen (seniors all), will eventually be full-fledged mechanical engineers, but as operators of a power plant they still have a little to learn. It is indeed fortunate that the regular firemen were retained or we would probably have no lights at all.

THE TECH UNION BARBER SHOP
Located at the HOTEL WESTMINSTER
