Tech vs. Dartmouth With 900 Team—No Team Runs Dartmouth and Harvard.

The schedule of relay races for the Tech-A.A. meet has been arranged to facilitate the attendance of all concerned. Tech is to meet Dartmouth in the 300-yard relay. Two of the threeenned race with Dartmouth and Harvard in the 729-yard relay. Last year, Tech was defeated by Dartmouth after having won the two previous years, but expects to come back (Continued on Page 3.)

COURSE IV SMOKER

E. I. Williams, '98, Will Speak to Architects Tomorrow.

Tomorrow night, at 7 o'clock, the Architectural Society will hold one of its regular meetings, a feature of which is the smoking lecture. Mr. E. I. Williams, '98, who has taken Mr. Coney's place in the Architectural Department of the Institute, will give an informal talk on 'The Architect's Materials and their Use.'

Mr. Williams was graduated from the art school at Lenox, and after spending several years in Europe, he returned to America, where he has served as traveling secretary, assisting in the field, and later as the assistant of the American Institute of Architects.

SENIOR PORTFOLIO.

Contract With C. W. Hearn, 729 Boylston, for Pictures.

At a meeting of the Senior Portfolio Committee of the Chemical Society, the contract for photography of the Senior Class for this year's Senior Class was awarded to Charles Messer & Co., 729 Boylston.

Mr. Messer was last year's photographer, and the committee felt that he had had much to do with the success of the previous year's portfolio.

The committee urges all Seniors to have their pictures taken as early as possible. No charges will be made for any sitting, and Mr. Messer guarantees that he will have every class seated. Appointment

SCHEDULE

B. A. A. A. MEETING TOMORROW

Professor W. K. Lewis to Speak to Society After Important Business Meeting.

At 7:30 o'clock, tomorrow night, the Chemical Society will hold a very important business meeting in the Physics room. At the monthly meetings held during the early part of the term it was found difficult to take up adequately the business affairs of the society. There is consequently much old business to be considered, as well as the discussion of the revision of the constitution to be discussed. It was also expected that the matter of changing dues will be gone over thoroughly, and so it is the desire of the officers that all the members of the society be present.

Professor Warren K. Lewis has been selected as speaker for the evening, and will give a very important monthly social meeting which will follow the business. He has chosen the subject "The Profession Man in the Community," and he himself is a professional man for several years before he began to teach. He is expected that he will be able to say that will be of particular value to students and chemical engineers.

Professor Lewis is still in active touch with the commercial world, for he is consulting chemist for one of two big manufacturing plants.

Professor Lewis is one of the finest teachers at the Institute. Although only thirty years old, he is already Associate Professor of Chemical Engineering. He can talk with great authority on important chemical subjects and has written many papers on the subject.

This license expired December 31, 1912, by order of the Postmaster General, and the private corporation.
