MORE MEN WANTED.

Show Orchestra Needs All Available Institute Men.

With the beginning of the new term, the Tech Show Orchestra starts upon the interesting and important work of making a spectacle that was originally organized. Last term the Orchestra was one of the most of the time in getting acquainted with each other, with their leader, Mr. McConathy, and with the methods that go on in concert work. They gave several concerts, all of which were highly successful, and showed themselves to be able to attend to work of playing at the performances of the Show. From this time on the Orchestra will work upon the music that has been accepted for "Money in Sight." The first rehearsal will be held on Thursday afternoon, February 13, at the usual hour of 4.15 P. M. Mr. McConathy will be present, and it is hoped that there will be a full attendance.

To the men who have not already reported to the Institute the work will be done, but it is thought that Technology is being rapidly increasing importance of aeronautics in the near future. Some time in the coming term, the Tech Show Orchestra is to take all of the trips to which they have been accepted for "Money in Sight." The first rehearsal will be held on Thursday afternoon, February 13, at the usual hour of 4.15 P. M. Mr. McConathy will be present, and it is hoped that there will be a full attendance.

AEROEYDINAMICAL LAB.

The Institute may establish an Aerodynamic Laboratory in connection with the proposed course in aeronautics in the near future. Some time ago it was reported that the laboratory was to be established, and probably an aeronautical society in the United States. The officers of the society were recently changed, on account of the graduation of last year's president, and the new officers, P. C. Wheeler, president, and J. A. Tewman, vice-president, were installed yesterday.

MASTORS WILL DINE.

First Meeting of New Club Held Tonight in Union.

The first meeting of the Masons at the Institute when they formally organized some weeks ago, will be held in the Union this evening. After a dinner at 6 P. M., the election of officers will take place. The price of the dinner is fifty cents. Circular letters containing copies of the new constitution have been mailed to several prominent scientists.

The commission expects to co-operate with the State boards of health in this matter.

The list is headed by Prof. W. T. MacVeagh, Secretary of the Treasury. The others are Prof. E. O. Jordan, M. I. T., '89, of Harvard; E. O. Jordan, M. I. T., '88, of the University of Chicago; and G. C. Hyde, M. I. T., '96, of the University of California, all of whom are prominent scientists.

This commission was appointed on the recommendation of the Surgeon-General of the public health service, in answer to the question, "What is the Use of Impure Water?" resulting from the recent investigations concerning the influence of impure water on the public health. This action is preliminary to the setting up of regulations prohibiting the discharging of impure water on railroads and other lines of transportation.

The commission expects to co-operate with the State boards of health in this matter.

AVIATION LECTURES.

Course of Six by A. A. Merrill to Start Next Monday.

The advertised series of lectures on the science of aviation to start next Monday under the auspices of the Mechanical Engineering Department. Mr. Albert A. Merrill, already well known to the members of the Aero Club, will give six lectures on "Aviation."

Professor Miller invites Seniors in the engineering courses to his Boyce Hotel, 111 E. on February 11, 12, 13, 14, March 2 and 5.
