IN MEMORIAM.

Last Wednesday morning we heard some one ask why the American flag was flying everywhere. Can it be possible that the great war is not among us who do not know what last Wednesday in our country? Where is the knowledge of our own history and the much beloved patriotism of we Americans when we fail to remember the birthday of Abraham Lincoln, one of the greatest men America has ever produced or can ever hope to produce? The Lincoln Day, Independence Day and Election Day ought always to remain so fixed in our memory that we shall never forget. Without doubt, it is only the place of Lincoln Day to Washington Day that prevents the former from being recognized as a national holiday.

The President, especially, seems to be neglecting one of the finest opportunities that has ever been given to the Institute. We refer to the chances to study journalism under the instruction of the head of the English department, the Institute in connection with the work of THE TECH. Journalism, in its very simplicity, would like to take advantage of this most remarkable opportunity you only have to drop in at THE TECH and give your name. THE TECH will do the rest.

WRESTLING MEET.
(Continued from Page 1, Col. 3.)

The sixth match showed great promise all the way through. It was in the 158-pound class, between Walter of Tech, and Brown. Walter was the first round round Freeman soared a flying mare and landed Walter on the floor. The score was three to nothing in favor of the mat. The wrestlers were given

FORMATION OF NEW INSTITUTE SOCIETY.

Men Interested in French Met Yesterday Established Society.

Yesterday afternoon, at 4 o'clock, twenty men interested in the study of French, met in 59 Lowell and established a French Club. Professor Langley was a temporary chairman, and gave a few suggestions concerning the object of the club.

A committee of five was appointed by Professor Langley to make out a slate of officers for election, and the election was held immediately. The following officers were elected: President, W. E. Lucas, '11; vice-president, St. F. Smith, '16; secretary-treasurer, P. F. Poole, '16, and historian, R. Har- ritt, '16. The office of historian is a new one among societies here, and its duties will require the keeping of the minutes of the meeting in French. It is the purpose of the club to hold weekly meetings which will be conducted entirely in French. Discussion upon topics of current interest, chiefly concerning France, will be held in the meetings from time to time, and short informal talks will be given. Professor Langley has offered to give an illustrated lecture upon the history of Paris, which should prove very interesting.

The question of eligibility for membership was discussed at length, but the matter was left finally in the hands of the Executive Committee, composed of the officers of the club and Professor Langley. For the present all those in the Institute who are interested in French at all, or who are planning to take it up as a elective, are invited to attend the meetings. A committee of three, consisting of Professor Langley, F. McD. Wieland, and P. R. Brown, was appointed to draw up a constitution and present it at the next meeting for the approval of the members.

A large number of those who were present have considered taking French, and there is good reason to believe that the club will be very successful. The next meeting will be held Monday afternoon, February 24th, at 5 o'clock, probably in room 26 Lowell, but the definite place will be announced later. A notice will be given in the columns of THE TECH.
