Speaker at Meeting in Union

Thursday to Be F. B. Jewett.

Tomorrow at 6:45 o’clock, the Electrical Engineering Society will have its monthly dinner in the Union dining room. At this February meeting the feature will be a talk by F. B. Jewett, graduate of the Western Electric Company, who has not divulged his theme, but the officers and the social life committee are positive that their guest will have something of interest to say.

At any rate, the talk will be supplemented by a series of pictures thrown on the screen by the projectionists. All interested in, or pursuing electrical courses, are cordially invited to attend this meeting, and they are assured of a pleasantly spent evening.

The poor scribes have to suffer.

AID OF THE STUDENT BODY IS INVOKED

The fund跪easers of the students who left after mid-year have hardly echoed away into the distance before we are again made uneasy by vague and indefinite rumors floating through the ambience in an aimless, long-shot sort of fashion. Up to the present time the staff of THE TECH has been flummoxed by these mysterious which unshroud these rumors; but all the men are working hard and expect to have the problem solved within a few days, always provisionally.

At all events, before the rumors are solved, the committee will be called upon to sympathize with the student body in any perplexing problem. Briefly, the manifestations are as follows:

On or about February, the twenty-first, a tangle and upheaval has been swimming around the lower TECH office. It involved a discussion of the possibility of each student speaking.-

The Constitution is merely the chief subject for consideration, but the Rumor was merely a means of persuading the committee that they should not be cold-shouldered. The Constitution is stretched in a distorted manner and seemed about to dissolve within a few days. Always provisionally.

The poor scribes have to suffer.

SMALL TIPS FOR LARGE MEETINGS

This meeting Wednesday evening will be held simultaneously in the sanctum upstairs. The Editor-in-Chief of THE TECH, Mr. Buhler, and the speaker will speak simultaneously. Mr. Buhler will speak in the old lecture hall, the speaker in the new.

The art staff arranged their tables better than usual, and they have many more efficient workmen than ever before.

The work is taking on new interest, and there are still a number of seats to be filled before the full quota of twenty will have been obtained. The work is taking on new interest as it advances, and the committee hopes to be one of the most interesting and absorbing of the whole Freshman year.

We are now busy making up the remaining pages. Material for The Technical is gathered together as usual in the Graphic department. We are now busy reviving the past two months, and the work is practically completed.

ICAL SOCIETY.

Mr. Rahler to Speak Friday on Buying and Testing Coal.

Wednesday evening the Chemical Society will hold its regular monthly meeting in the Union. Mr. Rahler, the speaker, will speak on "The Buying and Testing of Coal." The meeting will be held at 9 P.M. in Room 11, Engineering A. At this meeting F. B. Stern, ’15, will give his illustrated talk on "Olympic Games at Sweden."
