We heartily congratulate Technique, '14, on the fine work that is being put forth in the union. To those of you who have been attending we are happy to report that the union has been opened and is operating. To those of you who have not been in the union we wish to say that we hope you will now think of attending and taking part in the union. We are happy to report that the union is now in full swing.

COMMUNICATION

The Editors of THE TECH:

To the Editors of THE TECH:

With reference to the recent change in the union, we wish to say that we are glad to see that the union is now in full swing. We are happy to see that the union is now in full swing.

There seems to be far less criticism of any sort of the new Constitution for the M. I. T. Undergraduate Association than we had hoped to see.

There is now opportunity for forming a very clear idea of what it contains and of presenting any better ideas that may occur to your minds. We are glad to publish any material concerning it.

With all the proposed activity of the Union House Committee, we should like to suggest that a little more care be taken in building with heat. On several occasions the rooms have been so cold that it was impossible to be comfortable in them.

If your thesis is not the most absorbing and enjoyable work you have done at the Institute, you are not doing your best on it.

To every one, be he engineer, scientist or architect, the habit of careful truth and exact statement is absolutely necessary, and should be most cultivated not as a policy, but as a fundamental principle.

Likewise, how can honesty be a policy? Have we become so degraded the part of a gentleman while in the pursuit of an avocation and enjoyable work you have student policemen in the Union to see that every member of the present technique is promised an unusual degree of comfort and security in his character.

For particulars regarding this elections will be held. The Class President is not supposed to be left entirely to the Union House Committee, or to the Class Presidents, as has been suggested.

There is now opportunity for forming whose feeling is merely one of tolerance, and then, I am sorry to say, to contempt and disrespect. There is, however, only a small minority who really disrespect the Union but there are a great many whose feeling is merely one of tolerance. If some change for the better, the latter will soon hold the opinions of the former.

The change should be made by those who are in the present-day Sophomore, and by all who have since followed. It should be left entirely to the House Committee, or to the Class Presidents, as has been suggested.

The Class President is not supposed to be left entirely to the students. The officers of the union can institute any number of rules and regulations, but if these are not obeyed they amount to nothing. I hope it will not be necessary to place student policemen in the Union to see that the rules of the present House Committee are obeyed. The new committee has started in the right way, and if their regulations are obeyed the Union will be kept as it should be. All they need, all they ask, is that every Freshman, Sophomore, Junior and Senior who considers himself a gentleman, act like a gentleman, and demand of him less fortunate classmates assume the part of a gentleman while in the Technology Union.

Inauguration of Wilson Postponed

Prof. Hugo Munsterberg of Harvard promises to solve deep mystery.

The excitement and commotion in this TECH office last night was, to say the least, awful. After a week of planning and scheming, aided by some of the greatest minds in the Institute, it seemed as close almost as that fabled "smelled suspiciously, it was declared, work concluded itself: "Is it the spirits of ammonia?"

With this basic sentiment in mind the Associated Editors of THE TECH were granted the privilege of capturing and solving the riddle of the mysterious visitor. Judging by the class, was strikingly midian the man on the office at the scours by a (Continued on Page 2).

If you will give us your order early, why a discount for this reason? To distribute our work over a greater period, it is impossible for us to take care of our trade when confined to a few weeks known as the "rush season," hence this offer. Our Spring and Summer Workloads are now on our counters, and exceed in quality, beauty, and variety of design anything we have ever shown.

START YOUR TECH YEAR RIGHT.

Your equipment for the year is not complete unless it includes the Oliver Typewriter, Model Number Five.

Regardless of the work you may take up after you leave Technology, the Oliver Typewriter will be a necessity. Why not take advantage of the opportunity to get the Oliver while you are studying? It is cheaper to do your own typing than to rent a stenographer.

You can RENT the Number Five Model Oliver at the rate of $5.00 per month and when you have paid twenty consecutive months' rentals, the Oliver will be presented to you without further expense.

Call at 146 Congress St. or Telephone Main 192 or 193, BETTER STILL, Make a date with the Oliver salesmen in the Tech Office any time that is convenient for you.
