INTER-CLASS GAME.
1915 vs. 1916 in Second Basketball Game of Series.

The date of the second game of the series between the Sophomore and Freshman basketball teams has not been decided, it is probable that the game will be held on Friday of this week.

Both teams have been practising hard during the past week, and may be expected to show much better form in this coming game than in the previous one. The faults of both teams were mainly in lack of team work, and with this improved they should play a vastly better game. Friday, the Sophomore team met defeat at the hands of the Freshman team, and was defeated by the Cunningham team by the close score of 35 to 21.

The Sophomore will also play Saturday with the fast Quincy Y. M. C. A. team, even if the inter-class game is played on Friday.

EPICopalians MEET.

At 7:15 o'clock this evening the Brotherhood of St. Andrew will have a meeting at the Trinity House on St. James Avenue, and the regular discussion will be the subject of discussion. It is hoped that the Rev. Mr. Van Etten will be present to lead the discussions. The Brotherhood cordially invites all men interested, especially Episcopalian amish, and would like to have men with a problem to present come. The particular subject will be announced.

WIRELESS LECTURE.

See Page 1.

The fact that the light emitted gives only a spectrum of pure hydrogen and does not show any of the characteristic spectral lines of the metals composing the electrical system, is of interest in operation, and once adjusted, it requires no further attention for a considerable time, a distinct advantage.

An attempt was made last night by some of the valiant men who are on the news staff to solve the mystery of the ghost who has lately been hovering over the office of THE TECH. The members of the staff were encouraged during their long wait by the following report of Professor Mansfield, who had gallantly offered his services to aid in solving the mystery of the ghost. According to all proclamations of previous days, the solution was made known last night, so a large number of men were present.

While discussing the persistence of the giant and the solution of the mystery, the expression implies that he, the professor, believes that he has found a way to do so. He has again offered his services tonight, and if means of nullifying the effects of the vapors is successful then the solution of the ghost's mystery is assured.

H. W. HOOLE, '88.

(Continued from Page 1.)

The problem of increasing the factory efficiency of the many plants operated by this association. He also devised and successfully carried out methods of standardization of products and for preventing the excessive waste of electricity, the most widely used wood in the hardware trade.

While occupying this position he worked to overcome the decay of machines by the Lufkin Rule Company, and Fred Crissey in the Saturday Evening Post.

Mr. Hoole's whole life is an excellent example to the men intending to enter the engineering professions and to those that have already proved that by accurate and conscientious work Americans can win their way to success against the greatest odds. The Institute may well be proud of him.

PRESS & HERBERT TAILORS

Announce the arrival of a complete Spring and Summer Stock of High Grade Fabrics. We are making a speciality of full dress suits. A suggestion to you. Come up and see about a new dress suit, in time for the Junior Week Parties. We can handle you right for both quality and price. Tel. B. B. 2037.
