THE TECH

Published daily, except Sunday, during the academic year by students of the Massachusetts Institute of Technology.

O. P. M. is PERFECT BECAUSE it is mild, fragrant, slow burning, free from artificial flavoring, and DOES NOT BITe THE TONGUE.

THE TECH, BOSTON, MASS., MARCH 8, 1913

TO ORGANIZE HEALTH SAFEGUARD WORK HERE

Prof. E. B. Phelps to Extend Service With Assistance of Others.

A co-operative health service, originated by Prof. E. B. Phelps of the Department of Public Health and Biology at M. I. T., for the purpose of assisting the authorities of any town within 15 miles of Boston to safeguard public health, is now in process of extension.

The system is being operated in Weymouth and is about to be tried in Belmont. The advisability of adapting it will be discussed by the residents of Framingham and Weston this month.

Interested with Prof. Phelps in the development of the work are Prof. W. H. Eccles and Mr. E. E. Cook, of the same departments, and Robert N. Hoy, a graduate of the Institute and health officer of Wellesley, who has the laboratory of the service is situated. Among the things the service will be doing at a minimum cost and will continue is a complete laboratory analysis of all the milk sold in a town or district, as well as to conduct regular dairy inspections. Milkmen will be instructed in accordance with the grade of milk they sell. Cultures in cases of infectious diseases will be examined and chemical tests made of infected horses or cattle.

The service also plans to wage a campaign of extermination against mosquitoes.

COMMUNICATION.

(Continued from Page 1.)

...than has ever been at Tech. They have not the time to par their whole energy into any one office or position, but do what they can in their spare time. Can you pick out twenty or so dozen men with enough of that "spare time" to study up all student questions so as to properly and wisely legislate for the entire student body? We certainly think not.

Furthermore, in view of the fact that the Memorial is to be a student club for the use of the entire number of students, the Undergraduate Committee thinks it desirable that all Tech men should have some part in the formation of the new building.

Here, then, is our chance to have a hand in the designing and equipping of what is intended to be the student Union of the world. Even though you do not think you have any aptitude in design, send in at least one suggestion to the Undergraduate Committee. It is required that this Union be designed and made two-storied Unions.

JOINT MEETING.

Prof. Smith to Speak on Trip to South Sea Isles.

On Thursday evening, March 20, there will be a joint meeting of the C. K. Society and the M. I. Society in the Union, at 8 P. M. The speaker will be Prof. Smith, of the Electrical Engineering Department, who will speak on his trip to the South Sea Isles, and he will also illustrate his talk by lantern slides of the modes of living. Prof. Smith also has some pleasant stories of the people of the native yachts and songs. Everybody is welcome.
