With the filling of the applications for seats at the Tech Show, March 7, the Managing Board of the Show has been able to make all the good seats that have been available dispensed by the good offices of the students. The Board has cared that there should be no more good seats, especially among the lower priced ones, available for any student, as well as those that are good at the afternoon performance, which is extremely successful financially.

Every man should realize that while Tech Show, March 7, has even now succeeded financially, every additional dollar means a greater profit for the Institute. It is no new to the hands of Tech Show that at the present time there is a credit shortage on the accounts; the Board has the credit that the Show is making. Every man that has put forth a good amount of effort to make the Show the most successful that has ever been given, not only by putting himself, but by advertising it to his friends.

TAKING OF POSTERS.
The TECH heartily agrees with Mr. Langley's letter which appeared in yesterday's issue regarding the taking of posters from bulletin boards. This is a matter that must be left to the Board of every student, and it is hoped that in the future no man who in any way calls himself a representative of Technology will be guilty of so small an act as to steal the property of any Institute activity. Such acts cannot help but reflect on the character of the student body.

THE POSTER THEFTS.
The continued and continually excited efforts have been made by those circles that can no longer be ignored. This outrage must be stopped. If the good name of the Institute is to remain unsullied, others besides the usual culprits will probably see these posters after they have been stolen, and should let no sense of honor prevent the exposure of the cowardly thief.

RETURN UNSOLD TAGS.
All men who have not sold their Tags to the Tech, should return them to the Tech Board, or to the delegation office. This is an imperative, as otherwise they will be the difficult to settle the financial standing.

THE WRESTLERS.
All Technology should indeed be proud of our Wrestling Team. They have had an extremely successful season, due to their persistence and perseverance, and have brought many of their friends to the Institute. The Board sincerely hopes that the team will be rewarded for its hard conflicting work by suitable assignments in the form of a "T."
