INSTITUTE COMMITTEE MEETING FRIDAY

Architectural and Wireless Representation to Be Discussed.

A regular meeting of the Institute Committee will be held on Friday, April 4, 1913, at 4.15, in Room 9, Engineering C. The business will include a report of the "Tag Day" Committee and of the committee appointed to conduct an "All-Tech Day Smoker." Besides further reports of the Treasurer and Finance Committee there will also be a report of the committee appointed to investigate the Constitution and by-laws of the "Massachusetts Institute of Technology Undergraduate Alumni Association." In addition Professor C. E. Chamberlin will address the meeting to present arguments why such action should not be taken by the Institute Committee.

COMPANY B REPEATS.

Wins Competition for Second Time. Excused from 4 to 5 Wednesday.

The members of Company B of the Freshman Regiment are once more in exalted positions among the companies themselves, and the conduct of the men while they are supposed to be at "Attention." Although it is rather early to be making predictions as to Prize Drill, the members of Company B think that if they are able to continue their good work that they will have "a good chance" to carry off the honors. A uniform of points during a month is excused from drill under the system which has been recently inaugurated by Major Cole. Under this system the company that gains the greatest number of points in a month is excused from drill for one hour of drill. The estimation of points is based upon the number of men present, the cleanliness of the members' quarters, the polish on shoes, the number of men present, the cleanliness of the armament, the cleanliness of the members while they are supposed to be at "Attention.

Although it is rather early to be making predictions as to Prize Drill, the members of Company B think that if they are able to continue their good work that they will have "a good chance" to carry off the honors.

BIological Meeting.

Dr. Calvin G. Page, Professor of Micro-Biology at the Harvard Medical School, will address the meeting of the Biographical Society tomorrow afternoon, in Room 42, Pierce. Although Dr. Page is a new speaker in Institute circles he is well known among medical men as one who has made many original investigations in his field of researches. In his talk tomorrow he will tell of experiments made with a view to determining the exact rôle of certain micro-organisms in the growth of disease. The subject is comparatively new and one which should be of great interest to those concerned with public health.

Crew Practice Daily.

The crew practiced Tuesday afternoon at 4.15 in spite of rather adverse weather conditions. The crew in a four-oared shell made a recent trip over a course of about two miles. The crew was: Wellington, bow, Stuart, 2; Jewett, 3; Duff, stroke; Querford, coxswain, and Herbstow, cox. There was still a fine chance for them to meet with some of the members of the Harvard crew on the Charles River, and there were several other boats in the race. The Harvard crew may be seen at the Head of the Charles River Basin any afternoon at 4.15.

KEEP YOUR PRELIMINARY THESES NOTES NEAT AND READABLE

while fresh in your mind. It is hard to read some of these scratch notes after the ink dries cold. What is the solution?

RENT A TYPEWRITER. What Typewriter?

THE OLIVER;

which has been in use exclusively in THE TECH offices for the past two years and has satisfactorily fulfilled every condition that has been imposed upon it.

See the "styles" at

146 Congress Street
