The third set of nine games between Harvard and Technology, which was played on Saturday, resulted in a victory for the latter. The final was played on Saturday, resulted in a draw. This made it necessary for Tech to win the two remaining games while Harvard had to win three.

In the two games D. P. Longe and E. R. Ford of Harvard defeated W. Grant and E. Jones, respectively. This made it necessary for Tech to win two of the remaining games while Harvard had to win three.

Crew practice has been held every day during the past week, with the result that the men are beginning to work together fairly well. Considerable trouble is experienced on account of the fact that some of the men do not report consistently. The men are all trying to improve in the heat every day and the men who are getting the best results show that it has not been hindered by the lack of shell. But starting in today, the Harvard crew will have to give up the Eight-Oared Shell because the Yale crew has been as good as it has been for years. The Harvard crew will start at 4:15 today.

CREW PRACTICE.

COMFORT AMONG TEACHERS.

The committee met in the office of the Secretary and President, Mr. W. A. Stone & Webster and is an author of one of the largest engineering companies in the United States.

"Value and Use of Statistics to Engineers" - Men of All Nations are invited.

Today, at 1:30, Mr. N. H. Daniels, of Stone & Webster, will talk at a meeting of the Electrical Engineering Society in 6 Lowell. He will give a general discussion of the value and importance of statistics to engineers and their use in practical problems.

Dr. Daniels is the chief statistician of Stone & Webster, and is in charge of the statistics of the company. He has been for many years the teacher of statistics at Harvard, and has written a whole series of books on the subject.

"Ladies' Night" is a great success.--Varied program well received.

Many nations were represented at the meeting of the Cosmopolitan Club in the Union Saturday night, and a "Ladies' Night," a large number of the fair sex were present. The evening opened with the reading of one of Rudyard Kipling's poems, which is representative of Cosmopolitanism to a high degree.

Mr. J. W. Howard, of the Civil Engineering Department, who has recently returned from Costa Rica, was next introduced. Mr. Howard has been engaged in making surveys and determining boundary lines, and was thus enabled to obtain many pictures of the surrounding country, including a photograph of the construction work along the Panama Canal. These pictures were shown on the screen and explained.

This evening the program was given in the Union, and consisted of a series of lectures, and a musical program.

TECH CHESS TEAM DEFEATS HARVARD

Steady Playing Wins Closest Match of Series for Technology.

The deciding set of the series was played last night, and eight men participated. They played hard and thoroughly, and the first victory went to Harvard when E. K. Batalov defeated W. C. Merril. Then D. E. Woodbridge won the first victory for Tech by defeating D. P. Corse of Harvard. A three-man match followed by the decider of the series for Harvard when Corse took an important piece without forfeiting any of his own pieces. Woodbridge played skillfully from this point on and, at the end, came out victorious.
