Haverhill Pastor Will Speak On
"Phases of the Industrial Problem" Thursday.

At the regular weekly T. C. A. talk in Union Hall next Thursday noon, the Rev. Nicholas Van der Pyl will be the speaker. Rev. Van der Pyl is pastor of the Congregational Church in Haverhill. The subject of his talk will be "Phases of the Industrial Problem."

Mr. Van der Pyl is a widely known speaker and is a recognized authority on social problems in general. He was a member of the commission appointed by the Confederation of Churches of Greater Boston recently to investigate the great Lawrence strike situation. Mr. Van der Pyl is very active in all kinds of social up-jit work; he is one of the officials of the Twentieth Century Club of Boston, a well known organization noted for its extensive work in civic betterment. These facts are assurance enough that the officers of the T. C. A. have secured a prominent, and excellent speaker, one well worthy of the support of the Institute body. This occasion will be the first time that the T. C. A. has asked an out-of-town speaker to come to the Institute to address the students. Rev. Van der Pyl will come from Haverhill especially for this talk, and the T. C. A. hopes that the attendance will be one of the largest, if not the largest, of the year.

The subject of the talk is one of considerable interest and is one of vital concern to the industrial world today. The talk should be of some importance to Tech men, since, as such, they are often the first to face difficulties of the nature of those upon which Rev. Van der Pyl will speak.

COSMOPOLITAN CLUB.

(Continued from Page 1.)

Mr. Cadesas then introduced T. E. Custer, a student at the Institute, whose home is in Dayton, Ohio. Hearing the vague and indefinite reports as to the condition of the country in the South region, and not being able to obtain any definite news from his parents, Mr. Custer decided to go home and investigate for himself. Accordingly, he was made chief of the trip, although the last they had to hide in baggage cars and travel the rough ways that he faced now was in force. Mr. Custer recounted his adventures in the most interesting way, and as he had been thoughtful enough to take his camera along and many about a hundred pictures, these were projected on the screen by means of the reflectoscope, and added greatly to the interest of his story.

Following this T. E. gave a skillful exhibition of the game of shuttlecock which is played by all classes of people, both old and young, in China. This was followed by native songs by Z. Y. Chow, which pleased the audience very much.

FRESHMEN WIN.

(Continued from Page 1.)

The two Freshmen, Gray and Murphy, in the order named. Each team had five men on their score, which stood 26-29 and 26-24, and the excitement was intense when Basnett, '15, led Dean, '16, onto the field by about a yard. The Sophomore evidently working harder than the Freshman, and although the latter had dropped out of the lead, he managed to pull away from him at the finish.

The time was five seconds faster than at the Intercourse race, and considering the marshy condition of the field now had five men on their score, all the men who ran and who have been out in practice this season, and, of course, those who were at all should stick to the work and train down so that next year, when the country teams of the colleges will be weakened by the loss of their individual stars, we may send a well balanced team to all of these collegiate meets and bring M. F. T. to the front in 1916, when our team finished second. Next Saturday the men will be able to run in the regular half-mile, mile, and two-mile events. Their work will speed them up as well as strengthen them.

The order of finish was as follows: J. H. Demen, '16, time, 26.27; G. Gueslin, '16, 26.32; M. A. Mello, '16, 26.40; M. C. Burkett, '16, 26.44; F. D. Cook, '16, 26.50; P. J. Wall, '15, 26.54; H. E. Best, '16, 26.54; C. W. Lovell, '15, 27.30; H. F. Gray, '16; H. S. Benson, '16, time, 25.27; G. C. Estabrook, '16; M. E. Tietjen, '16, 25.40; F. B. Hastie, '16; T. G. Pollard, '16; F. M. Basnett, '15; K. Dean, '16; E. J. Goldenstein, '16; E. D. Polland, '16; F. M. Basnett, '15; and H. P. Gray, '16; measured 26.29 and the excitement was intense when Basnett, '15, led Dean, '16, onto the field by about a yard. The Sophomore evidently working harder than the Freshman, and although the latter had dropped out of the lead, he managed to pull away from him at the finish.
