Mr. B. A. Behrend Addressed Course VI Men in the Union Last Evening.

Last evening the Electrical Engineering Society held a very successful meeting. Mr. Behrend not only spoke of the historical development of electrical engineering, but also of the latest engineering projects which are now interesting people.

Of the engineering marvels now before the people, Mr. Behrend mentioned the building of the Panama Canal. The building of the Canal was abandoned by the French because they would be of no use to them, but the Americans decided to build it because they think it will be of advantage to them. Whether the Americans are correct in this theory or not, the spirit of that is behind which the Canal is being built is that the many rivers of the world are to serve as an essential factor in its working. These rivers will never be destroyed.

When Mr. Behrend took up the original subject on which he was scheduled to speak, he entered into a very detailed account of the development of electrical engineering. He mentioned the names of all the great men who have been prominent in the field. The meeting was postponed due to the importance of the subject.

ALT WINS DUPONT CUP.

Sophomore Takes All-Round Trophy from Freshman Ely.

The Dupont Cup, a competition for which closed Wednesday, was won by Edward E. All. of Class C, E. A. E., '15, second, and D. R. Baker, '15, third. All made very fine records in all the events in which he had trials, and showed clearly his right to the all-around championship. He was closely pressed by D. R. Baker, who was many points behind those two.

The Dupont Cup is competed for annually by members of the two lower classes. The events are divided into three classes, and each man selects five events, one from each class. Each competitor's score is the sum of his best time in each event, the number depending on the excellence of his performance. The trials are made in the Spring and Fall, and the points are added to his total at the end of each term. The one making the greatest total is the winner.

The events selected by All for his Spring trials were the broad jump, the running broad jump, the high jump, the tennis and track meet, the bicycle, and the high and broad jumps. Each event was to be awarded 5, 3, and 2 points, respectively.
