THE TECH, BOSTON, MASS., SEPTEMBER 30, 1913

FRESHMAN ADVISORS TO DINE TOMORROW NIGHT

Will Report To T. C. A. Officials In Charge of Week

But even Will Speak.

The Freshmen Advisors, who have been writing to the Freshmen during the summer and have helped them in their registration this fall, are to have a dinner in the Union on Wednesday night at 6 P. M. The work was car-
ried on under the auspices of the T. C. A. and has been a great help to the incoming class. It is required that all who assisted be present at this dinner to make reports upon their work. Dean Burton will be present and will address the assembly. The price of the dinner will be twenty-five cents.

WORK ON NEW SITE

(Continued from page 1)

now it is carried to the New Site by rail.

The raising of the general level of the land is not, however, the only feature of the work which is noticeable. The excavating for the foundation of the building, which is to occupy the corner made by Massachusetts avenue and the Esplanade, has progressed so far that piles may soon be driven.

In connection with the pile-driving some interesting tests are being carried on. A year ago a pile was sunk near the Esplanade, and its upper end weighted with concrete. Through measurements taken at the time it was driven and measurements now being taken by the engineers expect to learn whether the buildings to be erected near the river will settle as noticeably as has the Riverbank Court, an apartment house which is situated just across Massachusetts avenue from the New Site. Piles are now being driven along the Esplanade frontage of the lot.

At the back interior corner of the New Site the Stone & Webster Construction Company has been carrying on some tests on high voltage transmission line towers that were first begun at the Institute in connection with thesis work. When the tests were being made by the students the tower would be in the lot in the front of the Lowell Building, and within a few feet of the entrance to the Department of Modern Languages.

Now two such towers have been erected at the New Site, and between them stretches a five hundred foot span of a high voltage transmission line. The Stone & Webster engineers are investigating wind stresses and other factors in connection with these tests so that they may have more reliable information than has been hitherto obtained.

When these tests are completed the company intends to use the data obtained in the construction of a long distance line they are to erect on the Pacific coast.

FIELD DAY PROGRAM

(Continued from page 1)

length of each pull, 3 minutes; the first pull will be previous to the first quarter of the Football game, and the second pull immediately after the Relay race. In the event of a third pull being necessary, it will be held after the third quarter of the Football game.

In general, the rules published last year will govern the games. Class medals will be granted to managers and members of both Football teams not exceeding eighteen in number, to members of two substitutes and members of the winning Relay team, and to members of two substitutes, members of two subs- titutes, and members of the winning Tug-of-war team.

J. Arnold Rockwell, Chairman.

THE TECH, BOSTON, MASS., SEPTEMBER 30, 1913

Men of 1917, a splendid opportunity to display your spirit has arrived. The meeting to be held this noon to choose the temporary chairman and managers for the various teams presents an important duty as Tech men. This meeting, generally held immediately after the address to the new students, has been postponed a day in order that you may get better acquainted and so better fit yourselves for the choice of your officers.

The importance of these officers cannot be overestimated, for upon them depends to a large extent the success of your Favorite Field Day. With a large and enthusiastic crowd at the elections, they cannot fail to be enthusiastic, and will return this enthusiasm to the class to two or three-fold.

They will back up your football teams, secure a good coach, keep men out for the various teams, and do everything in their power to insure victory for 1917. They will lend their hearty and enthusiastic support to Freshman Night and work ever for the good of their class.

To do all this your officers must know that you are behind them, that you are with them heart and soul. You must give them the enthusiasm and do to this extent the meeting. Let every man of 1917 be on hand, for in no better way can you insure your success.

INSTITUTE COMMITTEE

Tomorrow afternoon, at 3.30 o'clock, the meeting of the Institute Com-
mittee will be held in Room 20, Eng. C.

The attendance of all the members of the committee is expected and several matters of considerable importance are to be brought up at this time. It is hoped that the business left over from last year can be finished up and officers elected at the places made vacant by graduation.

Capt. Gaetznick was a member of the R. A. A. relay team which established a new Canadian record last summer for the one mile relay.
