Yesterday at a Dr. Rockwell gave an instructive address to the Freshman class concerning personal hygiene. In a few well chosen words he gave the new men some valuable advice about a very important matter.

Dr. Rockwell is a graduate of the Institute in the class of 1896. While here he was active in all school activities and especially in athletics, holding the record for the quarter mile.

This was the first of a series of four lectures. The next one is to be given in Huntington Hall at 4 p.m. Wednesday, October 15. All freshmen are to attend these lectures.

SUMMER CAMPERs TO MEET

Saturday evening in The Union—Entertainment continued.

Saturday evening at 8 p.m. was an interesting meeting of the Tech fraternity. The members were those of the classes of 1896, 1915 and 1916 who attended the summer surveying camp at East Machias, Me. The gathering is for the purpose of having a general good time, and it will be the first of a series of reunions of the summer camp men.

The Professors and Instructors of these classes will be on hand and several of them will speak. The entertainment will be of a good character and rather light. The refreshments will also be light, but delectable. "Pop" Wool will sing several solos in his usual manner, while McKenzie and McGinty, the black-faced comedians who were a feature of the camp minstrel show, will present their bits of business. It is expected that these performances will be very humorous. Bob Schumacker will tell of the Miners' trip to Nova Scotia during the last week of camp.

Seully and Cooper will conduct the entertainment with several charming piano selections.

Many photographs were taken at camp and some of these will be brought to the meeting and a number of them projected on the screen. Pickering, Assistant Art Editor of Technicus 1915 took a group picture at camp and this will also be shown.

F. C. Foote and G. T. Rooney are in charge of the affair, and the former says: "Splendid Eats!"

ST. ANDREW CONFERENCE

There will be a conference of the Technology Chapter of the Brothers of St. Andrew next Tuesday at 7:15 P.M. The subject for the occasion is "Evolution and Christianity."

WEATHER

For Boston and vicinity: Probable rain; increasing easternly winds.

Several tests showed that the total energy of the sandwiches at the E. E. reception was remarkably great.

COMBINED MUSICAL CLUBS HOLD MEETING

COMBINED MUSICAL CLUBS HOLD MEETING

Election of New Officers at First Meeting—Match with Harvard Expected.

The Rifle Club will begin activities for the new term the first of next week and at a meeting, the time of which will be announced later, will elect officers for the new year and discuss plans for the coming indoor season.

This year the Rifle Team will again be affiliated with the Indoor League and the men expect to equal if not better their rating of last year, when the fault in fourth place out of a total of fourteen teams, only three matches being lost. The members of last year are all back in school with the exception of James S. Stewart, last year's .captain. Perky Shaw shot his last summer with the Massachusetts State Team, and with the American Team in international matches, and his loss will be keenly felt.

Practice for the team will be held two or three times every week and will be in the Armory again this year. A match with Harvard will probably be arranged for about the middle of November as a preliminary opening for the season.

If new men who are interested in the club and in rifle practice will leave their names and addresses at the Cage for the Rifle Club or for Greville G. Has- ton 15, they will be notified of the preliminary and other matters pertaining to the club.

JUNIOR NOMINATIONS

Names Must Be at Cage Before 5.00 O'clock Today.

Nominations for the officers of the junior class for the following year are due today at the Cage at 5 p.m. There are eleven offices to be filled, and more competition the better will be the result. All nominations must be signed by at least ten men of regular standing. Remember that all men who take part in the Army or in rifle practice will leave their class dues paid up.

HAMILTON NEW COLONEL

Others Officers of M. I. T. C. C. Are Announced—Chadwick, L. L.

The officers of the M. I. T. Cadet Corps for the ensuing year were recently appointed. L. E. Hamilton will take the place of E. W. Taft '15 as Colonel. The latter is now assistant to Major Cole, C. H. Chaffitz is the new Major-Colonel and C. R. Butts the Regimental Adjutant. H. T. Rent, Captain of Company C last year, is now the fourth major on the roster. Perry Shaw shot his last year's school year in the company of the Major. The remaining officers will be announced in a later issue of TECH.

CHESS CLUB MEETING

The Chess Club will hold at 5 p.m. tomorrow in the Union for the election of the officers for the ensuing year. Plans for this year's work will be laid out at this time and so all men who intend to join the club should be present.

Thirty-five men attended the meeting of the musical clubs in the Union yesterday afternoon. This meeting was called to give new men an idea of what was expected of them and incidentally to give the leaders a line on the new members.

A new reader is wanted, as H. G. Maun, last year's reader, will be unable to take that place this year.

J. D. Sattlibury, general manager, said that no western trip was possible this year, because the alumni felt that the money should go toward the new institute. Nothing definite has been decided about the other trips, although one to Northampton is almost certain, and there will probably be trips to Spring field, Pittsfield and Newport, aside from the various short trips around Boston.

The Mandolin Club needs a drummer also banjo and guitars. The Mandolin Club needs a large number of guitar players. Anyone who can play the mandolin should come to the trials. The Glee Club needs first tenors and second basses principally, but there is a good chance for anyone who can sing.

The trials for the Mandolin Club will be held at 4:45 today in the Union; those for the Banjo Club at 5 today and for the Glee Club at 4:45 tomorrow.

INDUSTRIAL CONVENTION

The new State Department of Labor and Industry in Pennsylvania is calling a convention to enable the heads of the state departments, engineers, manufacturers and industrial managers to discuss together topics of industrial welfare and efficiency and to suggest legislative and other means of bettering modern industrial conditions. As far as is known this is the first venture of this kind that has ever been made. The convention will be under the auspices of the Engineers' Society of Pennsylvania who will also have charge of the Manufacturers' Exhibit to be held in connection with the convention. If the efforts of this convention are successful it is probable that inter-dependence of engineer and manufacturer will be more fully appreciated than ever before.

SOPHOMORE ELECTIONS

Nomination Papers Due Next Thursday—Ballot Committee Selected.

The nomination papers for the Sophomore officers are due at 5 p.m. at the Cage a week from today. Papers signed by at least ten men are to be made out for the following officers: President, Vice-President, Secretary, Treasurer, two men to the Executive Committee, two to the Institute Committee and two to the Athletic Association. Every Sophomore who has paid his class dues should do so before next Thursday in order to enable him to vote for these officers. The Ballot Committee has been selected and will be ready before the papers are due.

Last night at 8 o'clock the Electrical Engineering Committee held their first meeting to select the new men of the year in the Union. Pres. H. B. Redmond spoke a few words and then introduced Prof. Wickenden, who spoke a few words about the Society. He emphasized the social side of the Society, on which he intended to turn his attention to the importance of professional societies. He said that practically all the big men belonged to some engineering society, and suggested that the best time to join one was now. Prof. Wickenden has always shown much interest in the Society on the eve of the taking of time from his lectures.

Prof. Jackson, the head of the Electrical Engineering Department, was next introduced and spoke of the relation of the Society to the College. The work in the course is mostly devoted to the teaching of things of a technical school, because so many big engineering organizations are situated here. The opinion of many the field of electrical engineering is increasing and advancing much faster than thirty years ago. The (Continued on page 7.)

INSTITUTE COMMITTEE

Meetings on Friday in 8 Eng. Many Discusions.

The Institute Committee will hold a meeting at 4:15 Friday in 8 Eng. This will be a very busy meeting because there is a great deal of business to conduct. The standing committee will give their report. There will be a discussion as to the need of a calendar committee, as well as the discussion of plans for Tech Night. The undergraduate number of the advisory board to TECH will be elected. The attendance of every member of the Institute Committee is desired at this meeting.
