THE TECH

Handbooks at Union

Through the kindness of Mr. Wells, assistant registrar, there will be placed at the Cage some tie today about two hundred copies of the "Handbook of the Principal Scientific Institutions of Boston and Vicinity." These books were printed by a congress of the "American Society for the Advancement of Science" which was held in this city seven years ago. The book covers the subject fairly exhaustively, treating such topics as the Metropolitan Park System, the botanical gardens, the geographical features of Boston and vicinity, etc. In view of the facts that the number of these books is so small and that they have not been printed wholly without expense, it is hoped that nobody will take one of them unless he is desirous of obtaining it. Copies will be distributed free as long as the supply lasts.
