FIFTH YEAR DESIGN

W. W. Barrow '12, a graduate student taking Fifth Year Design, and
L. C. Rosenberg, a special student, won first and second honors respec-
tively on their treatment of the first problem of the year. The problem
was the design of a boat-club establish-
ment and was treated in a unique man-
ner by both men.

COMMUNICATION

To the Editor of THE TECH—

Dear Sir—You ask for suggestions
that the new library might lead to improvement of
THE TECH as a student paper. I
believe that I voice a common
undergraduate feeling when I say
that THE TECH would be improved
materially by your installing a littl-

ing here.

Yours truly,
A Freshman.
