ONE OF OUR ORIGINAL IDEAS

**Keeping in Front**

You fellows know what that means! We've been very successful in this regard with Fatima Cigarettes. By the way, these cigarettes were first sold in the college towns—and you agreed with us that they were good. Then we put out for the big race, to make Fatimas of nation-wide reputation, and today more are sold than any other cigarette in this country.

No purer, or more carefully chosen tobacco grows than that in Fatimas. We purposely put them in a plain inexpensive wrapper—in this way we can afford quality tobacco, and twenty of the smokes for 15 cents.

Now your college crew's is utmost importance to you—so is a good cigarette, and it's your aim in life to keep Fatimas in the lead—right up to their good quality—right up to where you first found them, and will always find them.

Success follows! You started this cigarette on its successful career—and you pull a strong one all over this country.

**THE TECH, BOSTON, MASS., NOVEMBER 11, 1913.**

**Many Freshmen Take Track Instead of Gym**

Over Thirty-Five Already Registered—Wrestling and Hockey Get Their Share.

Freshman Gym classes started yesterday, and as usual there were a large number of men who will substitute track, wrestling, or hockey for the regular gymnastic work.

The large number of Freshmen who turned up for track shows that the competition for Technology's teams will be keener than usual this year. The prospects point towards a very successful Freshman track team with such a large number of candidates. Only about a dozen men have expressed their intention of going for hockey, but this list will probably be greatly increased later since today was the first day on which gym classes were held.

**Communication**

To the Editor of THE TECH:

A daily athletic column, I believe, would be a valuable addition to your paper. It does not follow from the fact that most students here lack a vital interest in athletics that all students do. Let us hear about the prospects for a good crew at the University of Washington, the latest in tennis in Australia, whether Yale's football practice was as rotten yesterday as it was the day before.

There should also be statements of the important non-college happenings in your paper. Many students do not buy daily papers and are correspondingly ignorant. Some have probably never heard of Huerta.

The special issue of THE TECH was very instructive. I think, however, that the students in general would like to know whether the work across the river is to be made more difficult, less difficult, or the same as here, and whether the requirements for admission are to be the same.

Is it planned to have a Varsity football team?

A. Stute.

**Free Handbooks**

There are still a number of "Handbooks of the Principal Scientific Institutions of Boston" left at the Cage, and one will be given free to every student calling for it. The Handbooks were compiled some years ago by Prof. Tyler and a large amount of information which should be of interest to Institute men. Besides a description of the schools and colleges there are short articles on the Museums and Libraries of Boston and Vicinity, the Park Systems, Water Works, Geology and Geography of the Boston district and Places of Historical Interest.

**Students' Cast-Off Clothing**

and other personal effects bought by
