The subscription price includes a week's vacation.

In Charge of This Issue:

Editor—L. E. Armstrong '15.
Assistant—E. F. Hewins '16, R. C. Fellers '16.

EXERCISE

Do you often find it impossible to study just when you need it the worst, on account of an inability to concentrate, an oppressed feeling in the brain, or a general languishment of the faculty of thought? Does this result in your having to stay up till an unmeaning hour to get your work finished? And does this in turn give rise to the same feeling raised to the n-th power next day? If you are an evening student and have been covering the ground in fast time, Captain Nye ran well last Saturday, and much can be expected of him. There are no producing nickel mines in the United States. The output of nickel from domestic ores is merely a by-product from electrolytic cells and metal equivalent to 308 short tons of metallic nickel were recovered at the rate of one cent a copy.

THURSDAY, NOVEMBER 20, 1913

ECONOMICS CLUB

There will be a short business meeting of the Economics Club in 8 Eng. C at 4:10 this afternoon. There are a few matters of importance which the officers feel should be acted upon before the activities of the Club are continued, and these will be considered at this session. The meeting will thus be a strictly business one, and will be for members only. New men who intend to join at once should also be on hand, however, as there will probably be an opportunity for them. The question of the next speaker will also be taken up.

Are you coming out for TECH tomorrow?
