TALKS ON SANITY
Small But Attentive Audience Hear
Interesting Lecture In
Huntington Hall.

Dr. Fleischer delivered a very interesting talk yesterday afternoon in Huntington Hall on the relation of "Sanity" to mental and spiritual welfare.

In introducing his topic, Dr. Fleischer called attention to the fact that religion is merely an expression of our relation to the Infinite, and that it was of this relationship that he wished to treat.

Our religious beliefs should, he thinks, be supplemented by reason. We must free ourselves from that inhuman creed of a change from an old order to a new, and accept the true facts of life unhampered by tradition and a blind acceptance of old creeds.

In following out this plan, he said, there seemed to exist in the minds of many a destruction of faith which would result. That this is absurd and groundless is easily proven when the fact that faith is far beyond mere creed is taken into consideration, and that faith is all-enduring and strengthened rather than dissipated by the introduction of what is after all simple truth.

This desire to delve after the fundamental truths of life, and to proceed from them to the characteristic feature of the present age. That this is the only sane, wholesome, and dependable way, and that this alone gives solid, enduring worth to spiritual interpretations is the essential basis of all things, and paves the way for a finer and more seeing faith.

In conclusion he stated that he had always been of the opinion that he wished to treat.

That it was of this relationship that it was of this relationship that this alone gives solid, enduring faith.
