NOVICE TEAM PICKED FOR WRESTLING MEET

Competition Keen In Elimination Matches—Freshmen Show Up Well

Candidates for the novice wrestling meet with the B. Y. M. C. A. next Saturday were given free tryouts in earnest and many scrappy matches resulted. Especially was this true in fourth and seventh. Of these matches the choice of three men is still left in each of these classes, and there is a chance of all getting in the meet.

The first match between Haslai and Stevens was a very close one. Haslai got a fall. Durkee succeeded in putting Berger down and Blakeney defeated Rod. Wood and Murtz put up a close fight and there was little to choose between them. Both of them had a share over Berger in the 158-pound class.

The novice team is now as follows: 115-pound class: Bone; 125-pound class: Stebbing; 138-pound class: Durkee; Stevens, Berger; 145-pound class: Wood, Murtz, Peterson; 158-pound class: Goodell; heavy-weight class: Leslie.

SOUTHERN CLUB DANCE

Next Monday evening, December 8, the Technology Southern Club will hold a dance at the Copley Plaza Hotel. This will be the first of a series of big social functions which Pres. Williams declares will make this year a very active one for the Club. The dance will be preceded by a reception which is not limited to the members of the Club, and which will be an excellent opportunity for everyone to get acquainted.

LYRICS CALLED IN

Those Accepted Will Be Announced In Friday’s TECH.

This afternoon at four o’clock the lyrics for Tech Show will be called in. This is not, however, the final call. It is simply to get an idea of the progress that is being made. Already several men have handed in lyrics, and the indications so far are very favorable. All the lyrics that are accepted will be announced in Friday’s issue of THE TECH. Thle very favorable. All the lyrics that are accepted will be announced in Friday’s issue of THE TECH. Those Subsitions who wish to try their luck will also have them in today, and if they are all right will be handed back to the writer before the next day.

FACULTY NOTICE

Professor Bates will be out on Sunday, December 6, and unable to meet classes in Eighteenth Century Literature.

The Metropolitan Museum of Art in New York has accepted a $15,000.00 collection of paintings, bequeathed by Benjamin Altman.

FATHER MURPHY SPEAKS BEFORE CATHOLIC CLUB

Church In History Of Italy Is Dis-Count Chinese Entertain.

The great success which has attended the gatherings of the Catholic Club this year was repeated last night at the monthly dinner held in the Union. The attendance was large and enthusiastic, and after disposing of one of Chief Holton’s master spreads, the members were entertained by the Chair in the evening. Prof. Francis Murphy.

Father Murphy is of St. Francis de Sales’ Church, Roxbury, and spoke most interestingly on the condition of the Church in Italy. Father Murphy is an orator and a scholar of ability, and his remarks bespoke a keen insight into the conditions and circumstances of Italian history.

Father Murphy noted that the history and triumphs of Italy have always been those of the Church; and, conversely, the glories of the Church are those of Italy; for the Italian have always won distinction under the auspices and patronage of Catholicism. He traced the progress of the two through the ages from the conversion of Constantine and the subsequent delivery of Christianity from the clutches of paganism Rome, to the present day, when in spite of socialistic influences, which envelop the Italian government, the Church, true to the faith of their forefathers. He spoke of the great accomplishments of Italy, and the Church in architecture, the development of the Gothic and Renaissance styles in painting, sculpture, music, literature and science, and told of the encouragement which the Church has always given to the development and progress of civilization.

Father Murphy’s talk was exceptionally entertaining and interesting throughout, and the officers in charge made the speakers feel at home. The audience which consisted of Hackeria and the Catholic Club, and the Club’s appreciation is very apparent from the increasing attendance.

Following the talk, the Club was entertained by Turpin Hai with a skilful exhibition of the skittles, similar to that which amused the Chinese students Saturday night. Mr. Hai’s consist, T. W. Tai, has played a selection on the flute and the moving closing with the singing of the Stein Song.

EDITORIAL CONTEST

The editorials submitted for the Pi Delta Epiloum contest have been very interesting, but the number submitted has not been sufficient to give an index of the undeveloped talent in this field. In order to stimulate the students to increase the number of entries, a prize of $30.00 will be awarded to the best editorial, and all members of the Tech staff are urged to try their hand at composition. The prize will be awarded to the editorials which are submitted on the subject of "The Future Development of the University through the Eyes of the Student." The deadline for the contest is December 15.

TECHNIQUE CANDIDATES

All Juniors who are interested in the business department of Tech-1915, and wish to try for the position of Assistant Business Manager, are requested to meet Business Manager George Voger at the Technique Office at 5 o’clock this afternoon. This position offers a good business experience as well as active membership on the Technique Board.

TALK ON DISPOSAL OF NEW YORK’S SEWAGE

Dr. Geo. A. Soper tells of Proposed Sewage System For New York City.

Among the seventeen-five men who listened to an extremely interesting talk given by Dr. Geo. A. Soper, president of the Metropolitan Sewerage Commission of New York, on the question of methods for disposal of the sewage before the sanitary section of the Boston Society of Civil Engin-1ers at the Engineers’ Club last night, were Dr. W. H. Goddewig and Prof. E. W. Porter, two assistants to the speaker.

Dr. Soper gave an elementary outline of the plans proposed by the Commission for the future development of the disposal of the sewage of New York City. At present there is no restriction on the amount of sewage flowing into any part of New York Bay or the harbor, and a new committee will be appointed to carry on the work. The uniform distribution of the sewage in the harbor will be of serious importance and it has been the great problem. It was found that sewage was not being carried out to sea at all and that the water was not being discharged into certain parts of the harbor, polluting them. A serious nuisance was caused along the outfalls along the waterfront.

The main feature of the plan is the construction of the small island three miles out at sea. The sewerage is to be collected and conducted to the island where it will be screened and heated in tanks and later discharged into the sea. The sludge will be taken further out to sea by steamers. The sewers are to be pumped 12 miles through a thirteen-foot culvert and then over the water by a crane 130 feet long. The pumping station in the upper East River will consist of eleven ice-cream stations, each being 12 miles long. The ice-cream stations will be replaced by new men and candidates for Asst. Bus. Man. Technique—5.00 P. M.
