The reformed class constitution which the Institute Committee has adopted for recommendation to the senate meets with our highest approval. As pointed out in the previous editorial, the advantages of having such a class started on its way in charge of older men, and of having the slate clear of unfair prejudices at the very start of the permanent elections, much more than counterbalance the sentimental disadvantage of being governed for a time by outsiders.

Another feature which will infuse more spirit into Technology affairs in general is the projected mass meeting at which the elections in all classes are to be announced together.

We sincerely hope that the constitution will be adopted in essentially the present form by all the classes.

We note with extreme regret the impending withdrawal from the faculty of Professor S. H. Woodbridge of the Mechanical Engineering Department. Professor Woodbridge is one of the pioneers of the science of Heating and Ventilation, having taken a leading part in the advancement of this branch of engineering from a very primitive stage to its present highly perfected state.

All who have known Professor Woodbridge personally or through his classes will miss his genial personality and kindly good humor no less than his effective and practical instruction.

THE TECH

Entered as second-class matter, Sept. 15, 1913, under the Act of Congress of March 3, 1879.

Published daily, except Sundays, during the college year by students of the Massachusetts Institute of Technology.

SENIOR PORTFOLIO

Nomination papers for the Senior Portfolio Committee were received by the election committee. Five are to be elected. The ballots will be out today and will be held at the Cage, next Tuesday morning. The nominations are: George A. Belch, Homer A. Foster, Donald G. Cowdrey, Thomas L. Goddard, C. K. MacFarlin, E. W. Morse, Howard L. Stone, and Abner H. Waitt.

INSTITUTE COMMITTEE

(Continued from page 1.)

other as treasurer, and the three others as members of the board. These men are to be a sub-committee of the Institute Committee and responsible to them for the affairs of the Freshman class.

The other main feature of the constitution is that all class constitutions, excepting the Sophomore class, shall be held at the same time. Nominations opening at the close of the third week, will be followed by the opening of the polls on the Friday the fourth week at eight o'clock in the morning and closing that night at eight. The results of the elections are to be announced at a mass meeting the following Saturday.

The freshman class elections, however, are not to be held at this time by the other classes, but come after Field Day. Nominations are opened the day after Field Day and remain open for one week. The printed ballots are then sent to the members of the class and the polls close one week after the ballots are sent out.

The interpretation of the constitution is left to the Institute Committee if any dispute should arise regarding any of the articles.

The Chicago Tribune will run a series of articles in the near future on the subject of "Is Co-education a Failure?"

The Class of 1915 suffered an irreparable loss last summer in the death of Professor Woodbridge's son, Stephen; the Institute is now to receive another blow in the withdrawal of the father.
