At the beginning of the meeting of the Electrical Engineering Society held in the Union last evening, the President announced that the dinner would be given about January 6th at a downtown hotel, the cost to be probably one dollar. Vice-Presi-
dent Mathew C. Bruch, of the Boston Elevated, had promised to speak, but because of the labor arbitration meetings will be unable to attend; however, the President has promised another distinguished speaker. He also announced that there is only room for two men on the an-
nual mid-year trip. There will be a trip to the Fore River Shipyard about January I.

Mr. L. L. Eiden, of the Edison Electric Illumination Company of Boston then spoke on the subject of distribution systems. He told of the first electric lighting system installed in Boston, which was constructed thirteen years ago, and described development up to this time, when they use 225,000 kilocandles. To give an idea of the site of his company, he said that they had absorbed twenty-five other companies during that time.

RIFLE CLUB

Match With Worcester Polytech
Arranged—Practice in Vacation.

The Rifle Team will shoot twice a month following vacation; arrangements will be made immediately after the holidays and the season ought to begin with a flying start. The first will be with Worcester Polytechnic Institute, where a club and team has just been organized, and will be in the nature of a practice match. As the second match will upon the intercollegiate season, it is desired that the team get into shape during the coming vacation. Any Rifle Club man leaving their names at the Cage today or tomorrow, for Lt. G. Haslam, Team Cap-
tain, will have one hundred targets apiece left for them. No men who have not paid their dues will receive these.

It is probable that a match will be shot with the first team of the Broad-
work in January.

High School during the second week in February.

ATHLETIC ASSOCIATION

It was voted at the meeting of the Executive Committee of the M. I. T. A. A. held yesterday afternoon to appoint the referees to the matches in the inter-class wrestling meet. This action is however, only a rec-
ommendation, since the matches will be finally decided by the Advisory Commit-
tee.

A motion was also passed provid-
ing for the appointment of a commit-
tee of three members, including the President, to revise the constitution.

Mr. L. L. Eiden Of Edison Company
Gives Interesting Talk To Electrics.

The big hockey game of the sea-
son for Tech will be played when she clashes with Harvard at the Arena.

A victory will mean a great deal to M. I. T., as a defeat of last year's intercollegiate hockey cham-
pions would give Tech considerable prestige in hockey circles. With this in mind, Capt. Macleod put his squad through a severe practice yes-
terday morning. The men are gradu-
ally breaking their team work, and it will make Harvard's much-vaulted de-
fense baffle to stop the hubris. Mr. 
Robinson realizes this, and, for the first time in its history, the team indulged in a Sunday practice after their de-
feat by the B. A. A. Saturday night. Harvard's individual play has been excellent so far this season but, like-
wise, the new team has been rather coarse in the last week of practice.

The Harvard team is composed of many stars this year, as it was last year. Captain Willett is a star for the defense both for his ele-
ven manipulation of the stick and his weight. Chaffin, his team-mate, is on a par with him in this line of work. The all-round play that has been the feature of the year. Carno-
champ at goal complete a trio, the equal of which is hard to find on any college hockey teams. The only reason that Carnochan did not play in the regular team last year was that Captain Gardner chose a goal of the All University College Hockey Team, played that position. Phillips and Hopkins in the forward line are superior to any other in the history of the game, and are running into last year's form, Sid Clark, their new man, is Har-
vard's great lowball play.

MINING TALK

Well-Known Consulting Engineer To Advise Mining Society This Evening.

The Mining Engineering Society will hold a meeting in the Union at 7:30 P. M. today, at which W. Sim-
mon's wife, M. I. T., 92, will speak on "Faults and Underground
Differences in Mining Development." Mr. Hitchinson is a well-known consulting engineer, who makes his headquarters in Boston. His work has, however, earned him to all parts of the country, where he has had the best opportunities for be-
ing acquainted with the prob-
lems offered by different types of mines.

TECH SHOW ORCHESTRA

The last regular rehearsal of the Tech show orchestra before the hol-
days will be held tommorrow at the orchestra operates is at present in need of a bass vio and a clarinet. Anyone playing either of these instruments, who is interested in the Show, is asked to report to the Musi-
c, in the Union any Wednesday after 4:30.
