HEAVY FOUNDATIONS AND PIER WORK

Course I, II, and X To Hear M. E. Society Speaker Today In 11 Engineering B.

This afternoon Mr. J. R. Worcester, of the J. R. Worcester Company, Consulting Engineers, will give a talk on "Heavy Foundations and Pier Work" in 11 Engineering B at 4:00 o'clock. The speaker has been procured by the Mechanical Engineering Society, and his talk will be of especial interest to all men in Courses I, II, and X.

Mr. Worcester is among the foremost civil engineers in the country. His specialty is bridges and structural works. He designed the viaduct across the Charles River used by the Boston Elevated Railway. One of his biggest pieces of work is the foundations and trestle work of the South Stait train shed. Perhaps the most successful achievement is the bridge across the Connecticut River at Bellows Falls Our largest cities many times employ Mr. Worcester's services and the importance of his work is evident.

The Engineering Commissions of our largest cities, many times employ some of these contractors. Mr. Worcester has been president of the Boston Society of Civil Engineers.

It will be decided at this meeting, whether first term Sophomores are to be admitted into the Society. This was to have been decided at the last meeting, but the meeting had to be postponed.

WRESTLING MEET

Tech Team Goes To Marblehead To Wrestle Y. M. C. A.

Next Saturday evening the Tech Wrestling Team will meet the Marblehead Y. M. C. A. Team. This team is composed of former Tech students, and Captain Kelly expects a walk-away for his team. The meet is scheduled for 8 p.m. at the North Station.

The matches are to consist of three classes, 125-pound class, 138-pound class, and two in the 138-pound class. There will be no matches in the 115-pound class and heavyweight class.

If the team which represents Tech has not as yet been announced.

MUSEUM OF FINE ARTS

Next Sunday at three o'clock, Sunday afternoon service will be held in the Museum of Fine Arts. Mr. Henry F. Roberts, assistant professor of Art History at Technology, will speak on Auguste Raffalet in the second print exhibition this season. Edward W. Forbes, director of the Fogg Art Museum will also speak briefly in the third gallery of modern paintings where there is a temporary exhibition of paintings in the library of the Fogg Art Museum of Harvard University. Both of these talks are free to all.

Another Rhodes scholar has been selected, Charles R. Classon, a graduate of Bates College, to be a member of the Rhodes Trust in 1918.
