Tables For Steel Stocking And Designing

BY J. J. AUBINGER, C. E., A. B. CO. ENG'R.

This is a practical and thorough manual of steels, and the language is concise and plain. The book is profusely illustrated, and the figures are accurately drawn. The section on steels is complete and up to date, and the section on railway construction is full of practical information. The book is a valuable addition to the library of every engineer and architect who is interested in the subject of steel construction.

W. T. HUNT, Jr., Structural Books, 150 Nassau St., N. Y.
