It has been decided to hold this year’s I. C. A. A. A. Track and Field Championship at Franklin Field, Philadelphia.

Pictures of prominent hurdlers in action are now on Coach Canady’s bulletin board in the Gym.

“Sprint” Geering is entered in the 600-yard run in National Indoor Invitational, to be held in Brooklyn this Saturday night. The record for this event was made last year by Brown, of Columbia, who won it 1:16. The breaking of this record is expected this year as three men are reported to have done better: Hirsch of the Irish American, Kelly of the same club, and Jimmy Burke of the R. A. A.

Members of the Track Team squad who desire to run in outside meets are reminded that they must be registered with the N. E. A. U. They may leave the necessary twenty-five cents with the Assistant Manager, D. B. Webster ‘16.

The Dartmouth freshman one-mile relay is said to be very fast. Rumor has it that they expect to lower the record when they go to Pennsylvania.

The present record for the indoor mile four man relay run is 3:29:1.5. Jack Ryder has hopes of turning out a team that will lower the record this year. One of the men who will probably run this team is Carl Gramm, ‘17, of the ’99 team.

Friday evening, January 9, is the date set for the Annual Indoor Interclass Meet, to be held at the Gym.

The entry list for the C. C. A. games to be held January 24 is now open and any three events are allowed. Entries close on the 19th.

Some men do not seem to realize that even the partial obstruction of the track is a severe handicap to a runner. When the track is being used, it is but courtesy for those not running to step inside the course and give the others entire freedom.

Yesterday’s work consisted mostly of starts and a short fast run.

SALE OF TECH FIELD

Evening before last the town of Brookline voted to appropriate $85,000 to buy the Technology Field, to be used as a playground and an enclosed field for the athletic activities of the High School. Tech will be allowed the use of the field, however, until the New Technology Field is completed.

point which is well worth consideration.

From one point of view, any change tending to decrease the already low percentage of voters is desirable; on the other hand, results might be improved if elections were controlled by those who take a serious interest in them, and who know enough about the candidates to make an informed choice.

On the whole, however, it seems that one day is too short a time to allow, though a week is more than we necessary. We recommend this change to the consideration of the Institute Committee.
