TECH AND HARVARD

(Continued from page 1)
in the departments of mechanical, electrical, civil and sanitary and mining engineering, both corporations will be concerned with the appointment of the instructing staff, but neither corporation will be called upon to make any payment of salary to a professor whose appointment has not been formally approved by it. The enlarged Faculty will have a double duty to perform. Under regulations from the Institute's Corporation, it will lay down engineering courses that lead to the degrees of the University, and under regulations from the University, will lay down comparable courses that lead to the degrees of the University; unless the regulations of the two corporations are different, the course leading to both degrees will almost certainly be identical.

Legalities.
The agreement is now complete, once it has been formally adopted and approved by the proper constituted authorities in both institution. With reference to the legality of the co-operation, a matter that is certain to provoke some discussion at first, it is merely necessary to say that this question has been referred to the Hon. Richard Olney, and in his opinion there is no objection to the procedure.

President Lowell's Statement.
From the point of view of Harvard University, its President, A. Lawrence Lowell, makes the following statement, which shows the broadness of spirit with which his institution enters into the agreement.

"Friends of Harvard University and the Massachusetts Institute of Technology—and they have many friends in common—have long desired the rivalry of two schools of engineering competing on opposite sides of a river. The disadvantages have been made even more evident by the decision of the Institute to cross the Charles; but the difficulty of making an arrangement satisfactory to both parties has hitherto been great. In fact, the obstacles to a combination between rival institutions have been such as to combine with the obstacles to a combination between rival cities. The difficulties that have long been the subject of discussion have now been overcome, here by a plan for co-operation which is the choicest offering we have ever made.

"I believe that the adoption of this agreement is a forward step of very great import to the future of education in this country. Incidentally, it is a step that is for the benefit of the world."

The New Model No. 5 Prin-
type Oliver Typewriter
makes an ideal machine for
students' use. It is a marvel
of simplicity, durability and
ease of operation. Printype
your notes and they will be
twice as valuable to you.
Easy terms if desired.
