KNEISZNER SPEAKS

ON CONVENTION

(Continued from Page 1, Col. 1)

The missionary work demands men with every variety of training. Not only preachers are needed, but teachers and engineers of every kind. A fine opportunity is offered to Tech men to give some help to this cause, both through their contact with foreign students, and through their own efforts.

NOTICE.

If there are any members of the Technology Aero Club now in the Institute who kindly communicate with J. M. Livermore, '15, by leaving their names at the Cage.

THE TECH, BOSTON, MASS., FEBRUARY 13, 1914

FINE TALK PROMISED

FOR CHEM. SOCIETY

Prof. Whittaker, Head of Dept. of Chemistry, at Columbia To Speak

Tonight at 7:30 at the Chemical Society meeting, Tech men will be given their only opportunity this year to hear Prof. Milton C. Whittaker, Head of the Dept. of Chemical Engineering at Columbia University.

Prof. Whittaker takes for the subject of his talk "The Future of Chemical Engineering." He has been an active participant in the University of Colorado, has been General Superintendent of the Wellschbach Company, and is now President of the Institute of Chemical Engineers, and Editor of the Journal of Industrial and Engineering Chemistry, in addition to his University work.

The course in Chemical Engineering at Columbia, which has practically been organized under Prof. Whittaker's direction, is a characteristically American way to Course X at Tech, and while more recently inaugurated than the better course, already takes its place as one of the three or four good courses in the country on that subject. A number of innovations have been made in the course, of which may be mentioned here the requirement in the summer of the third year of six weeks work in some chemical factory, with a report at the conclusion, in addition to the regular two weeks' Factory Inspection Trip with its report.

The place which The Journal of Industrial and Engineering Chemistry now holds in the field of American chemical journals, is also largely due to Prof. Whittaker's exerting efforts, and as he is well known as a speaker, and is an enthusiast on the subject of Chemical Engineering Education, the officers of the Chemical Society expect the talk to be one of the best of the year.

COMMUNICATION

To the Editors of "The Tech":

As far as I understand there is a committee, whose business it is to settle no serious conflict, occasioned by the activities of the Institute. Certainly if they were attending to business they would have done something to prevent the quadruple murder of Friday night. The Chemical Society is to have a meeting; the T. C. A. has just cancelled its social of its own accord, the Glee clubs go to South Framingham, and to cap the climax we have a meeting, the T. C. A. has just cancelled its social of its own accord, the Glee clubs go to South Framingham, and to cap the climax we have a meeting, the T. C. A. has just cancelled its social of its own accord, the Glee clubs go to South Framingham, and to cap the climax we have a meeting.

The uplifting influence of American men here. Those who profess Christianity must show by their actions that it is capable of doing good to the world.

The speaker mentioned Latin America as a territory especially in need of the missionary work. There the people are nominally Christian, but there is no life, virile church work. It is the land of neglect and ignorance with low moral standards. The uplifting influence of American ideals is badly needed. Educated men have a high position in these lands, and they can exercise a strong influence for good. For this reason it is important that all engineers and men of every kind-educators, lawyers, and others-who are educated at schools in this country should also strive to introduce the ideals of a higher Christianity into their country of birth. This also applies to China, India, and other lands, where engineers often have occasion to go in the course of their work.

The missionary work demands men with every variety of training. Not only preachers are needed, but teachers and engineers of every kind. A fine opportunity is offered to Tech men to give some help to this cause, both through their contact with foreign students, and through their own efforts.

MUSICAL CLUBS CONCERT

The Combined Musical Clubs will give their first concert of the term at So. Framingham tonight. It is to be at the High School and will be followed by a dance. A special car will leave Park square at twelve o'clock, and every man should be there as early as possible to avoid delay.
