Young Men's Hats for Every Occasion - COLLINS & FAIRBANKS COMPANY

383 WASHINGTON STREET - BOSTON

CO-OPERATION WITH STATE

(Continued from Page 1.)

the Technology department of the Technology of Electrical Engineering, gave a short resume of the matters wherein the Institute is of material aid to the state. The first and most important is the training of men to take responsi-

bilities in engineering positions and such positions where men are to be found in every public service department and commission. The Faculty is represented in the Boston Transit Commission and the chairman is one of the Faculty; the Charles River Basin commission had members from the Institute and engi-

neers trained at the school; the Mu-

seum of Fine Arts has Likewise Tech-

nology men in important places. "The committee that attended to the build-

ing of the Franklin Union, a school that makes for the betterment of the industrial world, contained Tech men and the director of the school is a graduate of the Institute as is also the head of Wentworth Institute.

Then again the members of the Faculty are called upon for information in a number of departments. Professor Bedgwick is almost continually in request by state and nation; Professor Moore has been in such de-

mand as bridge engineer that now he has given up the teaching; Professor Precoct has been of great service in matters of interest to dairymen while Professor Wackenius has gone to the State and West in matters of illumi-

nation.

Furthermore the laboratories of the Institiute have given to the national world epoch-making series of inves-

tigations and tests. Prominent among these are the timber tests of years ago, which furnished the foundation facts to builders and engineers; more recently there are the vehicle inves-

tigations, which apply efficiency for the first time to the use of self-

propelling wagons and trucks, and in the Electrical Engineering Depart-

ment there has been such demand for special work that six trained men are now giving their entire time to re-

search. The latest of these studies has been the request by R. H. Macy & Co. for an investigation of their package delivery system. Great things have come from the cooperation of the Institute, the citizens and the state, and the service has been accepted as a matter of course and has not particularly been exploited.

Professor Dwight Porter noted other important places in which the In-

stitute has done excellent service and called attention in particular to the choices of students. While these are primarily for the benefit of the student, about ten percent are of such high order that they are contributions to knowledge and of great importance. Dr. H. D. Walker at the research in chemical engineering, but regretted that present lack of space and increase in the number of stu-

dents forces the laboratory to remain comparatively quiescent. Four inves-

tigations are under way, one on the important subject of the flowage of oil.

Loyalty to the state was the key note of the meeting. It was shown that the Institute is of material aid to the state and that its future is related to the welfare of the city and Com-

mune.

It is to be the duty of the committee on Cooperation with the State to emphasize what has been done and systematize the present work, seeking methods whereby the Institute and its laboratories may be of even greater industrial advantage to the people in whose midst it is placed.

JUNIOR PROM

The music submitted for the Junior Prom is competition is due March 1, so the Prom Committee advises all who intend to compete to get busy.

A prize of six dollars is offered for the best original work, to be played at the Prom.

BOAT CLUB MEETING

There will be an important meeting of the officers of the Boat Club in the Union tomorrow at 5 p.m.

Date .........

SOMETHING NEW

CONTINUALLY

THE Technology Union Dining Room

is conducted on a co-operative basis for the benefit of the students of the Massachusetts Institute of Technology.

It serves wholesome food at the lowest possible prices, and fur-

nishes employment to students.

43 Trinity Place

RICHARDS SCHOOL OF DANCING

35 Huntington Avenue, Boston, Massachusetts.

Lessons at Regular Times, also private lessons.

CALL FOR BOOKS

The Tech Show books are expected from the printer tonight and it is planned to start rehearsals tomorrow afternoon. Definite announcement will be made in tomorrow's issue of THE

TECH.

SHUBERT THEATRE

Evgs. 8. Mat. Wed. and Sat. at 2.

THE WEDDING NIGHT

CASTLE SQUARE THEATRE

Daily at 2:10 and 8:10.
