ILLUMINATION IN ARCHITECTURE

The meeting of the Architectural Engineering Society which had been planned for two months, took place last evening at eight o'clock in 117 E. Owing to business, Mr. Guy Lowell was unable to be present, his place being taken by Prof. William of the department. Mr. C. H. Hopkins, president of the Architectural Engineering Society, introduced Prof. Clifford, who has made a specialty of illumination. In opening his talk, he stated that he was to a large extent ignorant of architecture, but that he did know the difference between the Ionic order and the lonic. Theory. The question of illumination and its relation to architecture is a very complex one. Many examples of otherwise excellent building have been spoiled by poor illumination. Prof. Clifford, in emphasizing the attention of so many architects toward this feature, stated that no designer would plan a building that could not stand, but as a general thing the other engineering features of construction in the acoustical construction, such as the acoustics, properties and lighting, are often entirely forgotten. The illumination must be adjusted to the color scheme, the proportions and the architectural effects desired. indirect lighting, which is so universally exploited to.

First Meeting of New Committee Will Be Held Friday.

The recently elected Technique Committee met first meeting Friday, Feb. 20, in 27 Rogers at 8.30. Special attention is called to the place of meeting, as the time was changed since the first notice were sent out. A. C. Beardsley, Editor-in-Chief of Technique 1914 and President of the new committee, addressed the meeting and gave them some ideas of their duties and methods of procedure. The names of students or permanent members will be taken up, and as soon as possible, probably at the next meeting, the committee will proceed to the consideration of such other business as the election of Technique 1914 board. In order that the affairs of the committee may be facilitated as much as possible, a full attendance is especially requested at the first meeting.

SHOW REHEARSAL BEGINS

First Rehearsal—Show Cast To Rehearse at Four This Afternoon.

This afternoon at four o'clock the first rehearse of the Tech Show cast will be held. The men in the following list are to be present:

- Simpson—Giggen, Parkinson, Brown
- Smith—Sheehy

Mr. Sangor is not to be here this year all the men have their parts learned, but there is to be no final choice of parts until he arrives. Men will be picked by how well they know their parts, rather than how well they act. It is important that everyone attend all the rehearsals.

From now on the east rehearsals will be held every afternoon at four. The list of those who made the chorus will be published in THE TECH on Monday and their rehearsals will start Tuesday.

T. C. A. MEETING

Bursar Ford To Appear Before Students for the First Time.

The speaker at the T. C. A. meeting this noon at 1:30 will be the new Bursar at the Institute, Mr. Horace S. Ford. This will be the second talk of the second term. Mr. Ford has chosen for the topic of his talk "Self-Service or Some Other Kind," and today's talk will mark the first appearance of the Bursar before the student-body. The T. C. A. expects a large crowd at the meeting.

FACULTY NOTICES

Second Year.

Section 2 of Course I will have its hour for precision of measurements changed on Thursday from two to three o'clock and will recite in Room 21 Rogers.

The class in Second Year English for Foreign Students will meet Mon- day and Thursday at 8 p.m. Students who will be teaching for the course have not yet determined their arrangements for the class. The arrangement should be decided by the last week of classes.

WALTER HUMPHREYS, Registrar.

First Year English.

Sections 23, 14, 26, 19 (2 to 5) will meet with Mr. Rayner on Friday, Feb. 20, at twelve o'clock.

ESTABLISHMENT OF CALENDAR SYSTEM

Union Committee Has Established a File of Dates of Institute Activities.

The Union Committee has now established a system of recording and filing in advance the meetings and various events of all the Institute activities. This system will make it impossible for any serious conflict to take place in the arrangement of dates for the stunt of any organization.

Cards have been sent to the secretaries of each organization which participates in the activities which concern the whole or only a few of the student body. The cards, on which space is provided for the name of the organization, are to be filled out and placed on file in the Union at the earliest date to which the event is to take place.

This file is to serve as a calendar of Institute happenings and it is proposed to keep this calendar for at least two months in advance. This surely gives every organization an opportunity to choose dates which will not conflict with the dates set by some other Institute activity.

The TECH will have access to this file and this insures publicity for the event. In fact this TECH will refuse to give publicity in advance to any event which has not been properly placed on file with the Union Committee.

The system will surely fill a long felt need for the regulation of the various Institute happenings and its success depends absolutely on the cooperation of every activity.

CALENDAR

Thursday, February 19, 1914.
