AD-M

INTERNATIONAL NIGHT
DEFINITELY ARRANGED

Cosmopolitan Club Meets—Date of Banquet Set for Twenty-fifth.

Yesterday afternoon at a meeting of the Cosmopolitan Club it was decided that the Tech Club will hold its own banquet on March 25th, unless some thing new is heard from the Harvard Club. At the last meeting a joint banquet with the Harvard Cosmopolitan Club was discussed, but as nothing definite has been arranged the Institute Club will probably hold the dinner alone, which will probably take place at the Westminster.

On March 28th, an International Night will be given in Huntington Hall and this will be one of the big- gest things that the club has ever given. One of the principal features in the entertainment will be an International Conference which is sup- posed to be held in the year 1925, the fiftieth anniversary of the opening of the Panama Canal. The funds raised by the production of this play are to be used by the Cosmopolitan Club in the New Technology.

A picture which was taken some time ago has just been finished up, but, since the day on which it was taken was very cold, the picture is not as good as was expected. Any mem- ber who desires to see it may come to Mr. Z. Y. Chow, who will be in 41 Engineering R every afternoon. The next meeting of the Cosmopolitan Club will be held April 1st.

COMMUNICATION.

To the editors of THE TECH: Before coming to the Institute, I looked forward with great anticipa- tion to the Friday Night Entertain- ment. After reading the news articles described in "Concerning H. I. T." To quote: "The Friday Night Entertain- ments, consisting of talks by representatives of such institutions as the Computing Society, the Magazine Society, the Men's Club, the Union, etc. have opportunities for de- veloping the social side of the Insti- tute life. The Entertainment Commit- tee has charge of Friday night Entertain- ments." Is there such a com- mittee? Where is it and what is it doing? If there is such a committee, why are we without the Entertain- ment? You would obligate me greatly if you would enlighten me on these points.

M. C. B., '17.

LIBRETTO WRITING.

Mr. Carh's class in Libretto Writ- ing will meet for the first time on the eleventh of March.

Dean Perry of Williams deplores the high cost of living at American colleges, saying that many men are kept from attending college who should be, but who are unable to keep pace with their expenses.

Arrangements have been completed for three cornered regattas between Princeton, Columbia and Penn to take place on Carnegie Lake on May ninth.

MUSICAL CLUBS HOLD SMOKER

Spring Concert To Be Held at the Copley-Plaza This Year.

The Musical Clubs held a combined rehearsal and smoker last night in the Union. This was the first effort of the officers. To this caricature is attached a system of weights which keeps an even tension in the rope throughout its length. This arrange- ment does away with the sagging of the rope on the loose side and permits the transmission of power to a shaft directly over or under the driver.

Mr. Sawyer illustrated his talk with slides showing installations in factories for transmitting various amounts of power under all sorts of conditions. He told of many interest- ing problems which have been encoun- tered in the designing power transmission to fit particular cases. It was stated that a policy should never be less than forty times the diameter of the rope if it is to carry and should be made sixty times if possible. He gave much data on the proportions of design and the results of some interesting tests carried out by the Dodge Manufacturing Company. Some of these tests showed an efficiency of 86 percent.

Mr. Sawyer's talk was heard by a large and appreciative representation of the Mechanical Engineering Soc- iety.

IMPORTANT PROM ANNOUNCEMENT

(Continued from Page One.)

subscriptions not signed for by the Juniors and Seniors. The Committee feels that after the two upper classes the Sophomores should be given the best problems which will come in from the Prom next year and we there- fore issue the announce here and now that no Freshmen will be al- lowed to attend.

Faculty intervention has eliminated the chance of professional baseball teams playing exhibition games with many of the western colleges.

PRESIDENT MCLAURIN MAKES ANNUAL REPORT

Activity of Alumni Is Praised—Changes in Corporation and Faculty.

President R. C. McLaurn, in his report for the past year at the Institu- tion, states that things are more sat- isfactory than they have ever been before. The Corporation has been strengthened by the addition, during the past year of Messrs. T. E. Pope, and N. Vail and William Endicott, Jr. The former is president of one of the greatest public service corporations in the country the latter is the bearer of a name that has always been closely related to Institute af- fairs from the very beginning. Two term members of the Corporation, Messrs. James W. Rollins and Arthur T. Bridgman, have retired while Ever- ett Morse has become a life member and three new term members are Messrs. Casa Gilbert, '78, the New York architect; Charles Hayden, banker, and Charles T. Main, '76, the Boston mill engineer who also has previously served as member of the Corporation.

During the year there has been no dis- ease to the faculty through death, but Professor T. E. Pope has retired and Professor Woodbridge is soon about to do the same. On the other hand, substantial additions have been made to the instructing force in the per- sons of Mr. E. J. Williams, '88, M. S., M. I. T. '98; Mr. A. LeMonnier, a graduate of the Brown Arts, Fast and Charles Hayden, '90, T. Bradlee, have retired while Ever- ett Morse has become a life member and three new term members are Messrs. Casa Gilbert, '78, the New York architect; Charles Hayden, banker, and Charles T. Main, '76, the Boston mill engineer who also has previously served as member of the Corporation.

The student body has continued on the increase in number and the registra- tion for the first term was 1685, a gain of 74 over the year previous. The foreign contingent is fifteen percent larger than before and, in fact, Technology has nearly twice as great a proportion of its students from other countries as any other in- stitute. Mr. McLaurn has the greatest of praise for the alumni of Technol- ogy which has manifested itself most notably in the work of three commit- tees, those on student housing, the alumni fund, Memorial and on courses in business and engineering administration.

In a business way, an important accomplishment of the year has been the selection of an architect, W. W. Bowditch, '83, for the planning of the new Technology and the Stone and Webster Engineering Corporation for the erection of the buildings. In ed- ucational matters there have been es- tablished a new course in industrial physics, of a research department and the beginnings of a course in aerodynamics.

One of the movements of great im- portance in the past year has been the beginning of the School for Health Offi- cers, in co-operation with Harvard University. The problems of the fu- ture will include the building of the new plant and the assumption of va- rious functions, including dormitory- hay, the new Walker Memorial and
