The bulletin in the Union shows that the Freshman class on the same evening will be considered, that of adopting the new uniform class constitution. The meeting is called for the purpose of considering the adoption of the new uniform class constitution. Several other matters will be mentioned. The plans will be discussed for the Prom which may be held by the Freshmen class on the same evening as the Junior Prom. It is desired that as large a number of the class as possible be present, as action on the new constitution should be taken at once. Under the old constitution, at least one third of the members of the class must vote in order to change it.

FINANCE COMMITTEE

At the meeting of the committee last night a new form of report was adopted that would make the understanding of them clearer, and more easy. A form of uniform receipt book was adopted and recommended for the use of all. The Tech Show book got for the year was examined and discussed. The representatives of the following organizations were absent without excuse: Class of 1916 Athletic Association, Mechanical Society, Minias Society, Officers Club, Rida Club. No reports were received from the Sophomore and Officers Clubs.

SENIOR DUES

If any Senior has not paid his class dues by this noon, he will be ineligible for the Class Day Committee, which is to be elected next week. The bulletin in the Union shows that there are still some delinquents. The names on the bulletin will be taken directly from the list, and no changes can be made after twelve o'clock today.

BOAT CLUB MEETS

Two New Shells Will Be Ready in April.

At the meeting of the Boat Club officers yesterday afternoon the work throughout the winter was discussed and the plans made for the spring season. During the winter the officers of the club did considerable soliciting among the alumni for funds to carry on the sport. The men met with considerable success and secured enough to warrant the buying of two new four-cared shells. These are being built by Davis, who builds the majority of the shells for the colleges. They are expected to be ready by the fifteenth of April and regular practices will begin at that time.

As last year, the men will use the A. A. A. boat house. Some negotiations were carried on with the Union Boat Club but these were not satisfactory.

The races this year similar to last year will be inter-class events, the advisability of varsity races will be considered for next year according to the showing made this spring. The Freshmen and Sophomore will race each other and the winner will compete against the stronger of the Junior or Senior crews. Another meeting of the club will be held the first week in April when an effort will be made to get all the possible interested and out for crew.

CHEMICAL SOCIETY

Meets Today To Plan Trip to Worcester Plants.

This afternoon at four-thirty there is to be a special business meeting of the Chemical Society in 24 Walker. The meeting is called for the purpose of considering the adoption of designs for pins for the society and new shingle designs. At this meeting the date of the trip to Worcester will be decided upon. On the trip the members hope to be able to visit the plants of the American Steel and Wire Company, the McGratten Leather Belt Company, and the Norton Brick and Tile Company, at time permits.
