THE TECH

NEW DEPARTMENT IN TECHNIQUE 1915
Alumni Will Contribute Largely To Review of Interesting Facts.

Technique 1915 has introduced a new department to be known as the Review Department. Technique has for so long been looked upon as merely a book, the chief literary part of which was a short write-up of Field Day or perhaps some extra brilliant class history, that it may seem strange to refer to Technique as maintaining a high literary standard, but such must be the case if the books of the future are to carry on the work so well started in Technique 1915.

To this new department the Alumni have this year contributed the great er portion, telling the reader many things of interest and value. The undergraduate may have an idea that Tech has illustrious alumni and may well appreciate the fact that there is much to be said with when he goes into actual business, but in a majority of cases he does not have the opportunity to hear the successful graduate tell exactly the part which his Tech education has played in his success or the problems to be solved. As a book of information for the undergraduate body Technique has felt that it was the place for the student to gain such knowledge.

This year has been a big year in the development of the Student and in a way Technique 1915, besides Technique 1916, has accepted a position unique in the history of that publication. It stands, so to speak, on the very threshold between the new and the old. Bearing the number of the year in which the building of both the new and the old Technology is being carried on, it is possible that the students of both the new and the old Tech men is becoming actually visible as the buildings rise, this year's book has the opportunity which no other Technique ever had and everyone will have to present to its readers both the new and the old Technology, to trace the wonderful work of the past and give glimpse of the future.

The real purpose of the International Night is to give an understanding of foreign nations. Much has been said about the International Night which is to be given by the Cosmopolitan Club on March 24th, but the purpose of this entertainment is probably known to only a few people. It is the intention of the Cosmopolitan Club to give a better knowledge of the other nations and to cultivate a closer friendship. The authorities of the Institute have realized the need of such a place, and have proposed the Club a big room in the Walker Memorial Hall.

The Cosmopolitan Club has been one of the most active organizations of the Institute, and has given a series of entertainments each year with the main purpose of giving a better understanding of foreign nations. Such a purpose in view, all such entertainments have been given at the expense of the Club to all the mem-

EUGENE N. SANGER

the scene of action. Before taking the trip Mr. Sanger signed a contract to stage the Tech Show once again, and it is possible that the study of the battles there have given him valuable suggestions.

Mr. Sanger was first connected with the Tech Show in 1911, when he staged "Presidential French." He was chosen from among those who were considered for the place because of the ability manner in which he had staged other productions, particularly several of the more successful of Daniel Frohman's musical comedies. He has had charge of a large number of the more important amateur plays which have been given throughout the country. Of late years he has made a specialty of college dramatics. Some of the better known of the college dramatic clubs with which he has been connected are: The Princeton Triangle Club, the Columbia Club of New York, the College of the City of New York, the Harvard College Club, the well known "Jest and Song" Club at Union and the "Hasty Pudding" Club at Harvard.

PREPARATION FOR SPRING MEET BEGINS
Varsity Squad To Discontinue Practice Until Field Is Opened.

Beginning today all track work for the varsity squad will be discontinued until the Field at Brookline is opened. This step is deemed advisable on account of the present inclement of the weather and in order to afford the mental and physical rest up between indoor and outdoor seasons. All Freshmen who are substituting Track for Gym, however, will be required to report to the Gym department.

When the frost is finally out of the track at the Field the work for the spring will be pushed forward with an earnestness and a vigor which is calculated to culminate in the most successful season that Track has yet enjoyed. The Spring Meet this year is to be one of the chief attractions of Junior Week, coming on the morning of Friday, April seventeenth, at ten o'clock, and the survivors of the Spring Concert and the Show, male and female alike, will witness a most superb exhibition of Technology's Mercury in the prime of their existence.

The added attraction this year will be the four class relay race over the Field Day distance, one and one half miles, each team composed of twelve men, each man to run two hundred and twenty yards. All the heroes of past Field Days will compete. Nineteen fourteen's ancient record breakers will be there, many of them old, obese and infirm, but some of them

CALENDAR

Monday, March 23, 1914.
5.00--1914 Class Day Balloons due at the Cage on Tuesday, at 5,00 PM.

All balloons for the Senior Class Day Committee must be handed in at the Cage not later than five o'clock tomorrow. As the balloons so far have been coming in very slowly, the committee in charge of the election has extended the time limit from today at 5.00, to next Monday afternoon, at 5.

The committee in charge of the election again wishes to emphasize the importance of this election, as the results will largely determine the success of Class Day. Only the names of those men who have paid their dues for this year were included in the list of names on the ballot, and only those ballots signed by men who have paid their dues will be counted. The dues, however, may be paid in with the ballot and in that case the ballot will be valid.

SENIOR CLASS DAY COMMITTEE BALLOTS DUE
