NO EXTRA DRILL

Army Inspector Changes Plans—Two Hour Drill Next Week.

The two-hour drill to which the freshmen were looking forward yesterday did not materialize on account of a change in the plans of the army inspector. The following general order was read in drill yesterday afternoon:

The Regimental Inspection will take place on Wednesday, May 6, 1914, at 3 p.m. The drills will take place on Wednesday from 3 to 5 p.m., beginning April 1. Monday and Thursday drills will be omitted after this week.

By order

CLASS DAY COMMITTEE

The first meeting of the Class Day Committee will be held on Friday, March 31st, at five o'clock in Room 8, Eng. C. It is expected that all members be present as the marshals for Class Day are to be elected at this meeting.

JUNIOR CLASS PICTURE

The Junior Class picture is now on sale at the Cafe. Those who hold receipts for the deposit already made can obtain the picture by presenting the receipt and the second deposit of seventy-five cents.

COMSTOCK TO SPEAK TO CHEMICAL SOCIETY

Unusually Interesting Talk On Related Sciences For Tomorrow.

This Friday evening at seven forty-five Professor Comstock will speak before the Chemical Society in the Union. Dr. Comstock is a graduate of the Institute, having received his diploma in 1894. He received his Ph.D. from the University of Basel two years after leaving the Institute, this being in 1896. He is now Professor of Theoretical Physics.

Dr. Comstock will give his talk on "Modern Physics and Chemistry," pointing out the effect of several of the most recent discoveries in Physics and Chemistry and showing how these have greatly aided both Physics and Chemistry.

The speaker is a firm believer in the idea that these two sciences are a great aid to each other, and that many of the new researches in Physics will throw a great deal of light on some of the chemical theories.

The T.C.A. expects to have an unusually large attendance at today's meeting, for the speaker is well known in and around Greater Boston. The various daily papers have devoted considerable space in their columns to his and his novel church methods. He has received particularly well on account of his giving plays in his church on Sunday evenings, showing how these have greatly aided both Physics and Chemistry.

President Dickson will make a further announcement in regard to the trip which the Society is to make to Worcester on the first of April. Some of the plants to be visited are the Norton Alundum Co., the American Steel and Wire Co., and some of the largest tannin and leather-bolt manufacturing plants in New England. It is probable that the Pin and Shingle Committees will also make reports.

INTERNATIONAL NIGHT

Cosmopolitan Club Will Feature "Peace Conference."

Promptly at eight o'clock Saturday will commence the first entertainment of the Cosmopolitan Club to which admission is charged. The "Peace Conference Act," which the committee announces as the feature of the program, will come at the last as a climax to a well selected bill of events. Following the program, there will be dancing until midnight.

Tickets, which are fifty cents and include both the entertainment and the dance, are on sale at the Cafe, the Supply Room in Room 4, or by members of the committee.

CAMBRIDGE PREACHER TO ADDRESS STUDENTS

Baptist Minister Who Attracts People With Plays To Be At Union.

The T. C. A. will have the Rev. Mr. Austin T. Kempton speak at the meeting this noon in the Union at 12:30. Mr. Kempton is pastor of the Northampton Baptist Church of Cambridge, and comes to the Institute as a T. C. A. speaker for the first time. He has chosen for his subject "True Maulahood." The T. C. A. expects to have an unusually large attendance at today's meeting, for the speaker is well known in and around Greater Boston. The various daily papers have devoted considerable space in their columns to his and his novel church methods. He has received particularly well because of his giving plays in his church on Sunday evenings, showing how these have greatly aided both Physics and Chemistry.

INSTITUTE COMMITTEE

There will be a meeting of the Institute Committee this afternoon at 5 p.m. in Room 6, Eng. C. Plans for the general convocation to be held in the near future will be discussed. In addition to this the standing committees will report.

WEATHER

Rain today, with rising temperatures; increasing south to southwest winds.

CALENDAR

Thursday, March 26, 1914.

1:30—T. C. A. Union.

4:15—Tech Show, Cast, Chorus and Ballet rehearsal. Union.

4:30—Mandolin Club. Room B Union.

5:00—Band Meeting. Union.

5:45—Institute Committee Meeting. Room 8, Eng. C.

Friday, March 27, 1914.

5:00—Technical Electrical Committee. Room 20, Rogers.

5:00—Glee Club. Union B.

5:00—Senior Class Day Committee. Room 8, Eng. C.

7:45—Chemical Society. Union.

8:00—C. E. Society. Ladles' Night. Huntington Hall.

Saturday, March 28, 1914.

8:00—International Night. Huntington Hall.
