roads after ten years time pointing out the deterioration that has taken place and the speaker will explain the cause of the decay.

Full details of the paving plants will be thrown on the screen allowing the men to get an idea of the first steps taken before actually beginning the road construction. Pictures of the laying out of industries on roads such as are commonly seen in the larger cities will also be shown. Professor Bred has seen the pictures before and heard the talk and thinks that it would be of advantage to all the men that can be brought.

The committee in charge expects a large crowd to turn out for this as a feature meeting of the society and a ladies' night.

"TRUE MANHOOD."
(Continued From Page 1)
players badly, and are thus a great disadvantage. He cited a case where an expert in a certain line was discharged, and a less capable man was employed, merely because the former made his chief "sick at his stomach." Besides, good bodily care counts in the third cornerstone, which is the efficiency so heralded of late.

Efficiency is the one thing which the world is demanding more than anything else in these days of mar- velous accomplishments and keen competition. It is therefore evident that no one should indulge in prac- tices which would in any way lower competition. It is therefore evident that no one should indulge in prac- tices which would in any way lower competition.

Dr. Comstock's subject is "Modern Physics and Chemistry." He will point out the effect of several of the most recent discoveries in Physics, and will show how those have aided both Physics and Chemistry. Prof. Comstock believes firmly that these two sciences help one another very much, and that many of these new researches in Physics will throw considerable light on some of the Chemi- cal theories. Prof. Comstock is well known as an authority on the constitution of matter.

President Dickson will make an announcement in regard to the trip which the Society plans to make to Worcester on the first of April. The members expect to visit the plants of the Norton Alumina Company, the American Steel and Wire Company, and a large tanning and leather belt manufacturing company. The Pin and Shingle Committees will probably also make a report.
