Today is the last day of Technique Sign-ups. No student who has not signed up and paid his full two seventy-five can take part in the rush. So far only a small number of the men who signed up for the book have paid their final deposits and the board requests that in order to facilitate matters on the day of the rush, all those who can should pay up and receive the term which entitles them to the book.

At one o'clock the band will start to play on Roger's steps and at one fifteen the parade will start. The entire student body is supposed to take part in this parade, and as can be seen on the circulars to be distributed by the board, there will be plenty of room reserved for those who do so. At one thirty the contestants will take their places in the semicircle roped off about the window. At one thirty-four H. R. Crowell, editor-in-chief of the book will fire off the starting gun. This will be followed by a great rush toward the starting line reserved for those who do not wish to participate in the rush, and will take charge of the men all afternoon. It is especially important that all the freshmen be there, as probably a line will be taken on both hands.

As the Captains of the class crews are to be chosen this afternoon, it would be well for every candidate to present himself at the boathouse.

IMPORTANT PRACTICE

All Crew Candidates To Report-Election Class Captains.

Today will be the rowing day and all of the Fifty men who were cut on Monday are expected to report today at three o'clock at the boat house. Coach R. L. Stevens is now around and will take charge of the men all the afternoon. It is especially important that all the freshmen be there, and as probably a line will be taken on both hands and on Monday the chances are strong that they will be divided into their class crews.

As the Captains of the class crews are to be chosen this afternoon, it would be well for every candidate to present himself at the boathouse.

Rifle Club

The Rifle Club will shoot at the Walnut Hill Range this afternoon, leaving North Station at two o'clock. Permission to obtain rifles from the armory may be obtained from either Haslam, Casselman, Parsons, or Dunn. Cost, Haslam requests any men who intend to try out for the team to make it a point to come out, as the time before the outdoor matches are to be held is very short.

Mrs. Fanny B. Adams

Many of the amusing incidents which occur so frequently in the Show, and which have always brought smiles to the faces of those who have seen them repeatedly were made doubly effective by being put on a suitable stage. This was particularly noticeable in the Uson Hall room scene, which brings in at most the entire east and chorus. It is sure to be one of the most successful parts of the performance.

The striking thing about the rehearsal as a whole was the dashing. This is given an even more prominent part than it has had in other Tech Shows. There has been a ballet in each of the recent ones, but this year those two, pony and a Russian ballet. The latter was introduced in connection with the many references to Russia in the plot. How one would have liked to have seen it done, and the complete Show was tried. Mr. Reganco Ranger was in charge.

SECOND ISSUE OF MONTHLY TUESDAY

Number of Pages and Illustrations Increased-Prize Winning Story.

Next Tuesday morning the second issue of The Technology Monthly is to be placed on sale. In this number several new features will appear.

Among the features of the second issue, which will be dated, May 1914, are the new cover design by O. R. Freeman, the Art Editor of Technique, 1915. In this issue the designer has kept the original Copyrighted Technology Border characteristic of last month's cover, replacing the center by a "Conventionalized Rogers Building."

The leading article is a rather timely discussion of Tech Show by a former Associate Editor-in-Chief of THE TECH. Aside from the several under-represented articles that are presented in the May number, the editors have fortunately secured from a consulting contractor in San Francisco, California, the complete construction details of the Panama-Pacific Exposition, presented in a form that is of particular interest to technical men. This article as well as the one on Tech Show is illustrated by full and part page photographs several of which are suitable for framing.

Among the features of the May issue of The Technology Monthly are those described in this issue and illustrated by photographic reproductions.

THE TECH

BOSTON, MASS., SATURDAY, APRIL 11, 1914. PRICE TWO CENTS

VOL. XXXIV. NO. 10
