THE TECH, BOSTON, MASS., SATURDAY, MAY 9, 1914.

TRACK MEN SHOWING EXCELLENT FORM

Three More Tech Records Arc in Danger—Practice Meet with B. A. A. Today.

The last few days the track team has been making great improvements. All the men are in fine shape. Tommy Huff has regained the strength he lost during his recent illness and is certain of placing in the New England Championship. Sewell, the Freshman athlete, is topping the timers almost as fast as Huff. Loomis and O'Hara are running the century and the furious closer to race time. The Okinshi brothers are covering their respective distances in great style. "Doc" Cook, as usual, cuts down his time in the 5-mile by leaps and bounds.

The greatest improvement during the week, however, is in the field events, which have long been the weak spot in our track team. Miller, '18, has bettered his distance of 175 feet by 20 feet since the Holy Cross meet last Saturday. He is just getting on to the style of bearing the weight and by the end of next week he expects to be able to break the Tech record of 130 feet, 10 inches, held by L. G. Metcalf, '12. Doc Leslie puts the shot over 40 feet every day and will give Whissel of Dartmouth a good tussle for first honors at the New Englands. There is, however, still nobody to take care of the discus. Conway, so far, is the best man in this event, but his distance is only mediocre.

Lawson, '16, has cleared 11 feet in the pole vault in practice and with a little push he should be able to beat the Tech record of 11 feet, 7 inches. The other Tech record which is most likely to be broken this year, is that of the broad jump. Charlie Forster cleared 21 feet, 6 inches consistently, and his distance of 21 feet, 9 inches, last Saturday was only four inches behind the record. The high jumpers are not getting into top form as fast as the others, but they are improving steadily. Sullivan, Tesson and Hull are all clearing 5 feet, 7 inches at present.

The practice meet with B. A. A. this afternoon will provide some good experience for the men. Although no score will be kept, Coach Kanaly will take accurate times and distances. The work done by the men will show undoubtedly what the men are likely to do in the New Englands.

LAST PRACTICE FOR MEMBERS MATCH

Rifle Club Shoot Today—Tech Championship Decided Next Saturday.

Members of the Rifle Club will have their last chance this afternoon to practice for the Members' Match, which will be shot next Saturday.

The Members' Match is held annually under the rules of the National Rifle Assocation, a medal being offered for the winner. The conditions of the match call for ten shots rapid-fire—1 min. 30 sec.—at a D target at 500 yards; ten shots sitting slow-fire at an eight-inch bullseye, 200 yards; and ten shots prone slow-fire at a twenty-inch bullseye, 500 yards, the possible score being 150. It is open to any member of the Rifle Club.

Two weeks from today all men who would desire to be given the opportunity to qualify for the N. R. A. marksman, sharpshooter and expert medals at the Wakefield Range. For these medals scores of 160, 185 and 210 respectively out of a possible 250 are necessary. Shooting is done rapid-fire at 200 and 300 yards, and slow-fire at 300, 500 and 600 yards.

COMMUNICATION

To the Editor of THE TECH:

Would someone kindly tell me why the „T„ medals were awarded in the dual meet with Holy Cross and not in the meet with Bowdoin? I have always regarded a „T„ as a prize very much to be coveted, yet, if a „T„ is not to be given out in a meet such as that which Holy Cross afforded, my opinion and I dare say, the opinion of many others of their value will certainly decrease.

Why not give „T„s in an intra-class meet? The Holy Cross meet was hardly more than one, in fact they had trouble in getting a single place in most of the events. The times were nothing remarkable, with one exception, and that athlete already exception, and that athlete already

stocked the „T„s for the winner. The conditions of the match called for ten shots rapid-fire at a twenty-inch bullseye, 500 yards, and slow-fire at 200, 500 and 600 yards.

THE SMOOTHEST TOBACCO

The New No. 5 Printype Oliver Type-writer makes an ideal machine for students' use. It is a marvel of simplicity, durability and ease of operation. Printype your notes and they will be twice as valuable to you.

Easy terms if desired.
