IN CHARGE OF THIS ISSUE

In closing what is probably the most eventful year for the Institute since its founding, it is natural to look backward for a brief survey of what has been accomplished. The realization of a New Technology is the chef d’oeuvre, but no less significant is the attendant revival of interest in the Institute on the part both of students and alumni. Particularly noteworthy is the closer relation in sympathy and mutual understanding as well as in community of interest between the latter two bodies. The tremendously important advance in education arranged for in conjunction with Harvard University is, from an altruistic point of view, remarkable in view of the difficulties in getting men out and is considered a fine tribute to Coach Frank Canby’s training. Altogether Tech took one first, 3-12 seconds, 4-13 thirds and two fourths.

The summary:
100-Yard Dash: Won by C. A. Rice, Maine; F. P. O’Hara, M. I. T., second; A. B. Leavell, Dartmouth, third; C. O. Olson, Dartmouth, fourth. Time, 10.3.
440-Yard Run: Won by C. W. O’Connor, Dartmouth; W. B. Hull, Maine; second; J. T. Higgins, Holy Cross, third; C. T. Goshout, M. I. T., fourth. Time, 1m. 58s.

MAIL FORWARDED
Students desiring to have mail, which is addressed in care of the Institute, forwarded, should fill out a summer address card, which may be obtained at the Cage.

still greater importance. The precise extent of its influence may remaining for the future to disclose.

Considerable improvement has been made in the curriculum, not only by the addition of important new courses but by improving, in a careful but conscientious way, the methods and practices already in existence.

The student body has shown a marked awakening as regards activities. This is shown particularly in the establishment of The Technology Monthly, which has demonstrated, particularly by its last issue, its right to rank as one of the best college magazines in the country. The support it deserves is slowly but surely increasing, and the placing of the crew on a firm basis. More advances of a scarcely less note, such as the improvement of the advisory council system, are too numerous to mention. On the whole, an excellent beginning has certainly been made toward a fitting start at the New Technology.
