ENGINEERING AND SCIENTIFIC NOTES

According to the latest reports, Coney Island is to have another isolated power plant. Bids have been asked on a 2500-k.w. capacity power and lighting plant, the main unit to be turbo-generators. This plant will be constructed by the Luna Amusement Co., and will furnish power and lighting for Luna Park and its attractions.

Tools that are used or stored in damp places can be kept from rusting by using the following protective coating: Get a half a pound of melted lard, stir in a half ounce of graphite, and apply the mixture hot to the tools after they have been cleaned and wiped dry. Any surplus of the grease can be wiped off after 24 hours with a cloth or clean waste.

The injured sheets.
