competition will start immediately. Its duration will depend largely upon the number and ability of the men who come out.

Experience is not necessary, as the competitors will be judged in the manner in which they form the work assigned them. All members of the class of 1918 are eligible. Any one interested who is unable to be at the Show office Friday between the hours of one and two should leave a note there for Manager Lucas.

at the old Tech Field where the men go around the oval course, making a distance of about four and a half miles. The dressing rooms at the Field are not at the disposal of the team but arrangements have been made with the Brookline gymnasium and the squad will jog there after the finish of the run where showers will be at their disposal. All men are to take suitcases so that clothing can be transported to the gym at Brookline, where they will find waiting for them.

The fare, including the cost of bringing the suit cases from Highland to Brookline will be twenty-five cents. Tickets can be obtained from the class of 1918 are eligible. SPECIAL

STATISTICS ON SCHOLARSHIPS GIVEN

One Student Out Of Five And One-Half Aided By A Scholarship Grant.

In view of the prominence given to scholarships at Technology by the discussion of the matter in Cambridge, the recent report of the Committee on Scholarships with its statistics becomes a matter of present interest. It is interesting to realize, for example, that one student out of every five and one-half is aided by a scholarship. In view of the large figures in many that come to so many within a few years of graduation, such statistics are of great value for a gauge of the capital that an education in a technical college represents. In the past year the sum of money expended by the Institute is nearly $23,000.

The number of grants has increased a little more rapidly than the total registration of students. In 1907-08 approximately one student in every 6.6 received a grant, and in 1912-13 the proportion was one to every 5.5. It may be thought that this increase has been due to a lowering of standard by the scholarship committee, but such suggestion is not true. The amounts awarded from Institute funds for this purpose have increased from $20,437 in 1907-08 to $22,652.50 in 1912-13.

Thirteen per cent of the scholarships in 1912-13 were granted to freshmen. It has occasionally been questioned whether it is prudent to give such aid to first-year students. As throwing light on this question the committee says that there is some risk in selecting students early in the course, but examination of the records show that the judgment of the committee, on the whole, has not been misplaced. Of the 17 freshmen in the class of 1913 who received some aid in the year 1912-13, all but one graduated. The exception left during the first term of his third year in good standing as far as his studies were concerned. And so in the class of 1912, there were 25 freshmen aided from the Institute funds; and of these 22 graduated. As evidence of the efforts of the committee to maintain a high standard of scholarship as a condition of receiving a grant, 12 of the awards for the second term were made subject to good records to be secured during the first term. Eleven of these students fulfilled the conditions.

FRESHMAN FOOTBALL

Twenty-five freshmen reported for football practice at the Y. M. C. A. held yesterday. The team was put through a sharp scrimmage, and the coach was pleased with the way the fellows were worked. He thinks that the material is very good and now that the men are reporting regularly the experts results will be gratifying in the next several weeks. The acting manager would like to see more of the men work for the team, and would like any fellow 18 who play football to report to him at the gymnasium.
