MONDAY, NOVEMBER 30, 1914

IN CHARGE OF THIS ISSUE.

Editor: C. H. Stevens, '17
Associate: R. W. Rounds, '17
Assistant: A. P. Sullivan, '17; A. H. Wemple, '17; G. H. Hall, '17

We hope that December seventh, the birthday of President Rogers, will not be allowed to pass as it did last year, without public recognition. For the past eight years President Rogers has not justified an All-Technology dinner such as was held in 1912. In any event, it is felt that to make December the first month of the New Year's resolutions is to do a disservice to every man. This year is one in which the country must make a definite effort to do things better.

Technology has been requested to do its share in contributing toward the Red Cross Fund. In view of the fact that at the present time there is such a great demand for the student's money, it did not seem advisable to resort to the usual methods of an entertainment or benefit performance for raising money.

The committee in charge, considering the matter, have accordingly come to the conclusion that the most feasible plan to pursue is to declare a certain day each month to be Red Cross Day. On this day stations will be established in the Institute buildings where the student body may donate whatever they wish to the cause of relief. Further details will be announced in ample time for all Tech men to save up at least a few pennies to donate to the cause.

The rather low returns from Tag Day indicate what appeared to many at the time—that the canvass CIVILS HEAR DR. POWERS SPEAK

Lecture Preceded by Business Meeting—Friday Trip Announced.

At the G. E. Society meeting Friday afternoon, A. C. Lederer, '16, was elected member of the program committee in place of P. K. Foster, '16, who did not return to the Institute this year. Mr. M. B. Dalton, President of the Senior Class, resigned from the executive committee in accordance with the point system. This vacancy will be filled from the class of 1916 at the next meeting. A vote of thanks was given to Col. Hahn and the officers of Fort Andover for their courtesy at the recent trip.

Press Thomas announced a trip to the new Boston & Albany bridge near Riverside for Friday, Dec. 4. The party will leave Trinity Place at 2.05. Men going on this trip are requested to sign the slips in the Drawing Rooms so that the committee in charge will be able to buy the requisite number of 125c commencement tickets. These tickets are sold with a reduction of practically 50 percent for each ride.

After the business meeting, Rev. Dr. Powers of Gloucester addressed the Society on "What Was One's Germany." According to the lecturer, Germany leads the world in five tests of civilization: (1) In the creation of art, Germany has no superior. For example, she buys a bar of oil paint in America for five cents and manufactures from this product worth $10,000. (2) The industrial and theoretical development of science has been made mostly by Germans. (3) In the elimination of waste, the highest test of civilization, there is little competition with other rival nations. In fire waste alone the United States exceeds Germany by 100 percent. (4) The mass of German people is far less literate than the common populace of any other country. The army acts as a school, to which every man must go. (5) The army people is far less illiterate than the army people.

THE TECH, BOSTON, MASS., MONDAY, NOVEMBER 30, 1914.

YOU judge a hoss's age by his teeth, a tobacco's by its lack of 'em. Two years' age isn't 't'he "teeth" out of VELVET.

In the slow, careful curing of VELVET, The Smoothest Smoking Tobacco, is seen the result of more than 30 years' experience of the world's largest tobacco manufacturer. This curing makes VELVET a slow burning, biteless smoke, which combines the famous pipe qualities of Kentucky's Barley de Luxe with an aged-in-the-wood mellowness. 10c tins and 5¢ metal-lined bags.
