COMMUNICATION

On the occasion of the Union Victory which was the subject of a recent editorial in your paper there are plenty of excellent grand opera records at the disposal of buyers but rather few ones playing popular music. The popular ones are of the period when "The Oceanian Roll" and "The Mysterious Bird" were recorded, for instance.

The matter was discussed by Professor Pierce of Harvard on Tuesday evening. The meeting was attended by Mr. Snow and Mr. Casey, were James E. Thomas, President of the Union Committee from purchasing more, but have they made any attempt to secure an appropriation from the other Institutions? Also in the Union Committee, Quinlan,梯芳, and Casey were present.

MECHANICAL ENGINEERS

VISIT STORAGE PLANT

View The Cold Storage Rooms And Power Plant Of Quincy Market Company.

About twenty members of the Mechanical Engineering Society enjoyed a trip to the Quincy Hall Market yesterday afternoon. The first sight was the packing of the fish as they come from the barrels of the fishermen. After being mixed, they are packed closely in shallow pans and carried upstairs to the cold storage room. Here a temperature of five to seven degrees Fahrenheit below zero is maintained, and the fish are frozen stiff in the pans. In other rooms, in this building, the fish are piled in flat sheets about two feet square, or heaped loose. The frost work in some of these rooms around the ammonia pipes is beautiful.

The members were also taken to another building where the fish are frozen in pans and carried upstairs to the cold storage room. Here the quarters are stored upon being received from the fishermen. Here the quarters are stored upon being received from the fishermen. The fish are frozen in pans and carried upstairs to the cold storage room.
