HONESTLY---WHAT'S YOUR OPINION?

You know we may be biased, and perhaps stubborn—but can't help it—in our firm conviction—that Dreus Garments—should above all others, any-way—he especially designed and made for the individual. Studies adjectives and glowing phrases never did—don't now—and never will supply the requisites to this end.

Our $50.00 Full Dress Suit has been accepted as the standard by the best dressed gentlemen of New England for many years.

PROFESSOR JAGGAR
(Continued from Page One)
as "Volcano House," is near the Post-office on the edge of the cliff that bounds the great crater of Kilauea. It is on the highway and in close touch by railway with the town of Hilo. The porch extending along two sides of the house commands views of three volcanoes, Kilauea, Mauna Kea and Mauna Loa. In the report of the observatory issued last summer Professor Jaggar made a number of prophecies concerning the future activity of the latter and it is thought probable that in investigating the present eruption he was attempting to confirm his previous statements.

The Observatory was founded by an initial contribution of $25,000 known as the Whitney fund, with the idea of a systematic observation of volcanoes. The first experiments were made in 1911. The work owes much of its initiative to the interest and activity of Professor Jaggar. Before coming to Technology in 1904, Professor Jaggar, besides having the degrees of A. M. and Ph.D. from Harvard, had studied at Munich and Heidelberg and had been Assistant Geologist of the United States Geological Survey for six years. He was also a member of the "Dixie Expedition" to Martinique in 1902.

Students' Laundry Work
I am prepared to do plain laundry work at a reasonable price. I will call for and deliver the work at the cage.
