MR. HUBBARD SPEAKS AT NOON HOUR TALK

Discusses The Accomplishments Of The Japanese In Manchuria.

The Technology Christian Association, procured for its weekly noon-hour talk today, Mr. C. V. Hubbard, of Japan, who gave, in a short talk, a very clear idea of what the Japanese have accomplished for the betterment of conditions in Manchuria.

Mr. Hubbard asserted that Manchuria has gained greatly from the Russo-Japanese war, despite the fact that it is suffered immensely from the direct results of the war. This is due to the fact that the Japanese have developed the mining resources of the country, and, have made proper use of the railroad facilities. Before the Japanese started improving the country, the people were poverty-stricken, and lived in a hand-to-mouth fashion on what little sustenance they could scrape from the surface of the land. The soil had been tilled until it was exhausted, and there was little fuel. The soil of the Soybean which used to be used as fuel and food in Manchuria, has been displaced in a large measure by Standard Oil products, and this has resulted in a great increase of the coal resources of the country, which are the very finest in the world, and now the population is not only furnished with abundant fuel, but exports large quantities. Mr. Hubbard spoke of coal with an unbroken coal vein 150 feet thick, with an output of 7000 tons per day.

The oil of the Soybean which used to be used as fuel and food in Manchuria, has been displaced in a large measure by Standard Oil products, and this has resulted in a great increase of the coal resources of the country, which are the very finest in the world, and now the population is not only furnished with abundant fuel, but exports large quantities. - TECHNIQUE 1915

(Continued from page 1)

The board plans to get out a book about the same size as last year's. The circulation of the Senior pictures will be increased 509 percent, as the sale of the Portfolio was a little less than 200 copies, while Technique expects to dispose of close to a thousand. Few outside the Senior class ever saw the Portfolio, and practically no others bought it. It may be said that it was intended only for Seniors, and so served its purpose, but it should also be of interest to the school as a whole, and if included in Technique, would add considerably to the prestige and influence of the Seniors. They would be better known, and the part they had played in undergraduate affairs would be better appreciated.

Even after receiving $300.00 from the senior class, Technique will start with a deficit of $150 on the scheme. This represents the increase in the printing and engraving bill, together with some incidental expenses, after deducting the money to be saved by the plan. This deficit, Technique plans to make good through increased sales to the Senior class, and through further reductions made in other sections, made by the elimination of features which are considered undesirable.

The above proposition was submitted to the Senior governing board at its meeting Wednesday noon, and while no definite action was taken, the sentiment of the meeting was very much in favor of the plan. It was decided to call a class meeting next Monday noon, in order to put the matter before the class for settlement. In the meantime it was the desire of the governing board that the matter be submitted to the class through the columns of The Tech, and that each interested make himself to form an intelligent opinion concerning the plan.

MUSICAL CLUBS
(Continued from page 1)

Intermission
1. (a) Lilacly, Brahms
(b) In Picnic, Gogod
2. Norwegian Blunder Song, Gilder
3. Winter Song, Ballard '97
