THE LABOR QUESTION

(Continued from Page Three)

over the burdens of the nation, as national suicide.

The "Life, liberty, and the pursuit of happiness" theory, he said, was

true to go on sale next Monday—Several Articles Written

by Students.

The labor issue of the Technical Monthly and Harvard Regional Jour-

nal will be cut next Monday.

This number, which is to be an undergraduate rather than an

issue number, will be in the student contributions,

several articles of technical nature, "Controlling Our Stream

in Forestry," is the subject of an article by Mr. Allen Chamberlain, a

stono newspaper man. This article is illustrated by four large pho-

graphs, three of which have been used by the Monthly by the United

States Government. Two maps of the White Mountain Region are to

be published, each printed on folded paper measuring nine by

seven inches.

One of the Seconares of Course X is an article of considerable

length in which he challenges the notion of all those interested in

a smooth running of Institute affairs. "A Manifold Delusion," is a title

of a short story dealing with the life at the Institute. It was

written by one of the Monthly's regular contributors and is illus-

trated by one of Life's cartoons.

The second chapter of Professor H. P. Abbot's article on the Tracking

of hermodynamics deals with the concept of "Newtonian Mechanics.

Another scientific article of considerable importance is "Our Engineer-

ing Curricula" by Professor H. E. Higginson, Professor of Electrical En-

gineering in Harvard University and as an Institute. In this article the

author severely criticizes the system now in vogue at our greatest engineering

schools.

The humorous side of the Monthly is published in the form of a poem by one of

the present Seconares.

PITTSBURGH CHOSEN AS CONVENTION CITY

Technology Clubs Associated

Will Meet Together

In February.

The Third Annual Convention of Technology clubs associated will be

held in Pittsburgh, February 19 and 20, 1915. Plans are far enough ad-

anced to indicate a thoroughly enjoyable reunion. The central loc-

ation of Pittsburgh, and the enthusiastic cooperation of the local associations, all in-

vite a larger attendance than at either the New York or the Chicago

convention.

The program is still tentative and subject to alterations. On Friday, February 19, the morning will be

taken up with registering and re-

newing old friendships at the Re-

union Headquarters, Hotel Schenley,

Grant Boulevard and Forbes street.

At noon there will be class dinners

at the hotel and at clubs in the vicinity when a chance will be of-

fered to recall old days and to re-

tell old tales. In the afternoon there

are to be excursions in small par-

ties, with competent guides, to points of interest to members of

each party.

Pittsburgh, chiefly noted as an in-

dustrial city, is the center of a dis-

trict whose mines and manufactur-

ing plants, insinuous and var-

ied, are uncorrupted in interest and

productiveness. But it is also rich

in other ways and offers much, in

addition to its mines and steel

works, that is well worth seeing,

particularly its examples of architec-

tures, bridges, public works play

grounds and museums.

In the evening the Pittsburgh As-

sociation will give a smoker at the

University Club in honor of the vis-

iting alumni.

On the next day, Saturday, the

morning will be taken up with

an
dution excursions in small groups for
d
to see other
te of interest. At noon

luncheons

at the hotel Schenley.

At each of these

alumni

will be held in and

the Hotel Schenley. At each of these

functions representatives from the

institute and one or more graduates

will lead a discussion of the needs of

the courses represented. Afterwards a brief business meeting of the

Technology Clubs Associated will

be held.

The big event of the reunion will be the annual banquet of the Tech-

nology Clubs Associated in the eve-

ning at the Hotel Schenley. Presi-

dent Macaulay and probably Presi-

dent A. L. Lowell of Harvard Uni-

versity will speak. There will be two

other speakers of international prominence whose names cannot yet be

announced.

DINE AT THE

Winter Garden

HOTEL WESTMINSTER

Special attractions every evening before and after the theatre. Continuous music. Singing.
