dent of the New Haven Railroad,
welcomed. He is a member of the Technology Corporation and of
the visiting committee of the M. E. Society. Mr. Elliott spoke of the op-
portunities for American engineers which would be given by the Euro-
pean war. He deplored the fact that the voter in this country is so dis-
interested in political issues. An invitation to visit the New Haven
shops at Readville was extended to course II men.

Mr. A. B. Tenney, '94, of C. F. Ten-
nay Co., who was the next speaker,
amused his audience by relating
some of his experiences since he left
Technology. Professor Hayward gave
a talk on the qualities which make
an engineer a successful man. He
emphasized the value of meeting oth-
er men and establishing a reputa-
tion by taking an interest in public
affairs.

Professor Miller gave a brief his-
tory of the M. E. Society, showing
how it was first kept running by the
professors and how it had now be-
come strong enough to stand with-
out the aid of the instructing staff.
