INSPECTION MADE OF SHIP AT NAVY YARD

Electrical Engineering Society Conducts Last Trip This Year.

The E. E. Society conducted the last trip of the present year last Tuesday when a visit was made to Charlestown to inspect the electrical equipment of the ship that is to be ready for the sea. Three recent electrical graduates were in the party that went over. The inspection was made by 25 members of the Society who remained on board the ship from two until six o'clock.

Through the courtesy of the officers on board, the men were permitted to investigate the range-finding room, the central station and the torpedo room. This is an unusual privilege, and every man is expected to show his talent along this direction. The inspection was made on board, the men were permitted to remain on board the ship from two until six o'clock.

T. C. A. Closes Unusually Active Year—Great Tribute Paid Mr. Cushman.

The T. C. A. closed their activities for the present year in an enthusiastic banquet held in the Union last Wednesday night. About fifty were present, including President Macal- lin, Dean Burton, the members of the Advisory Board, several Alumni guests, and the officers and committee men.

The retiring committee reported on the work that had been accomplished, and the new officers outlined briefly the plans for the coming year, chief among which are the more detailed freshman advisory system, already ready well under way, and the new T. C. A. "Ribile" which is to be issued next fall.

President Macalhin expressed himself as being well pleased with the reports of the committees and heartily in favor of the work which the Association had accomplished. He said that he hoped the work would be broad and not narrow down to too strictly religious limits.

Dean Burton paid tribute to Mr. Cushman for his excellent campaign last year at the Institute. Cushman's unusual success, the Dean believes, is due to the efficient way in which the work was distributed among a large number of students.

President Macalhin expressed himself as being well pleased with the reports of the committees and heartily in favor of the work which the Association had accomplished. He said that he hoped the work would be broad and not narrow down to too strictly religious limits.

Dean Burton paid tribute to Mr. Cushman for his excellent campaign last year at the Institute. Cushman's unusual success, the Dean believes, is due to the efficient way in which the work was distributed among a large number of students.

It was the consensus of opinion that the Association had had an unusually successful season. From all sides came expressions of commendation and best wishes for the coming year.

C. E. LECTURE

Mr. W. E. Spear Talks On Catskill Acqueduct.

About fifty men gathered in II Eng, B, Wednesday afternoon, at 2:30 o'clock to hear Mr. W. E. Spear talk on the problems met with in the con- struction of the Catskill Aqueduct, New York City's newest water supply. This system is to take the place of the Croton Aqueduct, but the latter will be used still to supply the lower parts of Manhattan.

ANNUAL PRIZE DRILL HELD THIS EVENING

Lieutenant McGuiness of Sixth Infantry Will Act Again As Judge.

The Technology Regiment will hold its annual Prize Drill this evening at eight o'clock in South Armory. After exception of graduates, they will review the men and exhibition of But's Manual will be given. The individual and Company drills will form the closing feature of the drill. The opening feature will be a Regimental Parade.

The judge of both the Company and individual drills will be Lieutenant J. R. McGuiness of the Sixth United States Infantry, who acted in the same capacity last year at the Prize Drill. The names of the men entering the individual drill are: A Co.—H. W. Long, D. McAskill, R. P. Kennard and A. S. Johnson; B Co.—

CLASS DAY COMMITTEE

Plans For Summer Week Nearing Completion.

At the ninth regular Class Day committee meeting held on Wednes-

sday, it was stated that Courses I and XI were to issue a challenge to the rest of the class for a baseball game on Friday, June 4th, at the class picnic.

Final action was taken on the form of entertainment to be given at the dinner and an interesting program is assured from present indications. The sign-ups have been coming in rather slowly and the fact was especially emphasized that not much more than a week remained for the entering freshmen to be turned in. Only Seniors holding sign-up slips are to be permitted to attend any of the Senior Week functions with the rest of the class.

It was also suggested that a custom carried out at some of the other schools be started at the Institute, namely, the holding of a "guilty" or "not guilty" affair where all those who are engaged plead "guilty." It was felt that such an event would add to the pleasure of the week.

JUNIOR CLASS MEETING

There will be a meeting of the Junior Class today at 1.00 o'clock in Huntington Hall. The question of amending the class constitution will be acted upon. The Institute Committee recommends that each class pass an amendment allowing the Institute Committee to amend the class constitution.

The matter of a class Portfolio in the junior year's Technique will be taken up. A contract drawn up by Technique 1917 will be read to the class and discussed. The class treasurer will make a report of the condition of the finances of the class and a report of the Frem will be given.

RIFLE CLUB

Over thirty members of the Rifle Club will journey to Walnut Hill or to Wakefield tomorrow to take part in the annual N. R. A. qualifications. The team squad will shoot at Wakefield, the others at Walnut Hill. Permits have been left at the South Armory for both rifles and ammunition; and every man is expected to carry out his own supply for the match.

TECHNICAL SOCIETY

All ballots for the election of officers of the E. E. Society for next year must be handed to Miss Payson before 12 o'clock tomorrow. The candidates for president are W. C. Brown, and J. B. Carr; for vice-president, E. J. Harney and B. D. Newton; for secre- tary, A. Martin and E. B. Stanson; and for treasurer, J. W. Barker and E. H. Nelson. A vote is also to be taken on the question of eligibility to the society of those of Course Y who are taking the electrical option.

TECHNOLOGY MEN TO FIGHT TYPHUS FEVER

Fifteen Sail For Servia Tomorrow To Aid In Stamping Out Plague.

In response to an urgent call for volunteers in the struggle against typhus fever in Servia, fifteen graduates of the Harvard-Technology school for health officers, and of Course XI, will sail from New York tomorrow to help stamp out this dreaded disease. Dr. Richard P. Strong, professor of tropical medicine at Harvard Medical School, is at present established in Servia, and is urgently in need of aid, as the country is now thought to be thoroughly infested with the scourge.

The work involves considerable personal danger, owing to the negligence of the disease, and requires the most rigid precautions, in addition to technical skill. Typhus offers in some ways a problem similar to yellow fever, but the transmitting agent of the former is the body louse, and not the mosquito, which fact makes the eradication much more difficult. In localities where the disease is not prevalent, and isolation can be maintained, it may be stamped out without much trouble.

ATHLETIC ASSOCIATION

Brown And Loonius Recommend For "T" Award.

At the last meeting of this year of the M. I. T. A. A. held yesterday afternoon it was recommended to the Advisory Council that W. C. Brown and R. G. Brown be awarded the "T." The men were recommended for the "T." Allan, Buchanan, Brownie, Coward, Doon, Gucker, Hamilton, Revere and Van Kirk. The members of the freshman Track team who won first places in the Andover meet were recommend- ed for their numeral. It was also voted to renew the contract with Bowdon for track meets for the next two years.
