FIELD DAY NOTICE

All men who were appointed as Field Day officials and have not yet received their badges are invited to call for them at the Cogge.

R. H. WHITE, '16.
All Technology Cheer Leader.

Shakespeare, '16, spoke of the need for restraining Tech Night at the Colonial; since this affair has been put in the hands of the Institute Committee, an entirely different policy will be followed, and absolutely no gamehouse of any kind will be on, the penalty being the closing of the show. No confetti or streamers are to be thrown.

The chief feature of the meeting was the enthusiastic practice of Technology songs, led by Cheer Leader White, with the Technique band ably assisting in increasing the general volume of sound. A very marked improvement in the singing of all the songs was attained, especially in "Take Me Back to Tech," which is said to be a novel way of singing the chorus by classes. This will be used at the theatre Tech Night.

TECH BOILER PLANT

(Continued from Page Three)

The electrical outfit is interesting since the engine room will serve both as a sub-station and as a central station. The initial equipment will include three turbines, direct-connected to three generators of 750, 600 and 150 k. w. respectively, furnishing three-phase current at 2300 volts. There will also be one 150 k. w. turbo generator and two 150 k. w. motor generators furnishing direct current at 110 and 230 volts, and two 25 k. w. exciters, one steam and the other turbine driven. The current at the various voltages will be distributed to the buildings and laboratories in lead-covered cables running in special conduits.

On the first floor of this building will be located the steam engines. They will include a Condit turbine of about 75 k. w. capacity, a 30 h. p. Corliss with dynamometer attached to the flywheel, a 525 h. p. McEwen tandem compound, a compound engine and generator of the same make of 25 k. p. and a triple expansion Corliss. These engines will be arranged along the western wall of the building. On the opposite side of this laboratory there will be located a Brown engine driving a three-stage air compressor having a maximum capacity of 3556 pounds per square inch. In addition there will be two or three other compressors and a few small engines to illustrate additional types.

CAUTION!

The new-day advances that come alone on this machine are all controlled by Oliver. Even our own previous models—famous in their day—never had the Optional Duplex Shift. It puts the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 28 keys, the least to operate of any standard typewriter made.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

17 CENTS A DAY

Remember this brand new Oliver comes at the old-time price. It costs no more than lesser machines—now out-of-date when compared with this discovery.

For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction.

Remove right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver it naturally follows that you want the finest model.

CAUTION!

This brilliant new Oliver comes at the old-time price. It costs no more than lesser makes—now out-of-date when compared with this discovery.

TECHNOLOGICAL MEETING

(Continued from Page One)

songs. There were nearly four hundred present, the four classes having the largest representation. William J. Farthing, President of the Senior class, opened the meeting with a short talk on the new policy for Tech Night. He said that the object will be to see the shouting not to make one. Organized enthusiasm will be the slogan for the entire day on Friday.

The formation of the Field Day parade was the next business, the parade will start at 1:30 o'clock sharp, on Friday, from the front of Rogers Building. The Seniors will form on Rogers steps, the Juniors on the grass by Rogers, the Sophomores on the steps of Walker. The line of march will be around Copley Square, out Newbury street to Massachusetts avenue, across the bridge, past the new Technology, and thence to the Field.
