CHEMICAL SOCIETY HOLDS FIRST MEETING

Dr. W. R. Whitney '99 Gives Talk On Industrial Efficiency—Two Trips Announced.

The Chemical Society's first meeting of the year was held in the Union last Friday evening in conjunction with the Boylston Chemical Club of Harvard. The speaker of the evening was Dr. W. R. Whitney, Technology '99, former professor of Theoretical Chemistry at the Institute and for some years a member of the research laboratory of Physical Chemistry here. He is founder and director of the research laboratory at the General Electric Company's plant at Schenectady. Dr. Whitney is ex-president of the American Chemical Society and also of the American Electro-chemical Society, and is now a member of the recently established Naval Advisory Board, representing the American Chemical Society.

Dr. Whitney quoted the words of the prophet of old: "And your young men shall see visions and your old men shall dream dreams." He said: "One could preach a sermon on that text and talk chemistry all the time. No matter what the prophet had in mind, he had a keen eye. Old men dream dreams and young men do see visions. It's a good scheme. My experience teaches me that knowledge, cut, dried blocks, labeled; mislabeled and unmislabeled and unmislabeled..."

GLEE CLUB CONCERT

Well Received At Wakefield Last Thursday Evening.

The Glee Club held its first concert in Wakefield last Thursday evening where they assisted at a bazaar and sold programs. Under the auspices of the Harmony Chapter of the Eastern Star Lodge. The club sang Poole's "Bedouin Song," and Hul- lard's "Winter Song" with much spirit, their efforts meeting with much favorable comment. As encore they used "Kentucky Babe" by George and a medley of ragtime ar- ranged by I. B. MacDaniel '16. E. H. Raymond '17 made his debut as soloist with the club; Winter Song, The Cat With A Cl-

Eminent Sculptor Lectures Architects.

Mr. Hugh Cairns Illustrates His Address By Actual Work Upon Clay.

The second of the seven scheduled speeches of the Architectural Society was held last Friday evening in the studio. After a few opening re- marks, President Brebny' introduced the speaker of the evening, the sculptor, Mr. Hugh Cairns. Some of the work of Mr. Cairns in Boston is the statuary on Trinity Church, the State House, the St. Vernon Church, the New England College and the Fine Art Museum.

The talk was illustrated by actual modeling. Mr. Cairns first explained the modeling board and the first principles of his art. He worked various designs, explaining as he modeled that, unlike the woodcarver, who cuts out his shadows, the sculptor must build his high-lights to cast their shadows. He said that while his work was rough, it would give the student an idea of what could easily be accomplished by correctly placing the simple highlights. This was illustrated by modelling several designs.

The audience highly appreciated the clever anecdotes with which Mr. Cairns, who is a close friend of Mr. MacDaniel '16, interspersed his talk. He invited the Society to his studio where he could demonstrate the making of casts to better advantage. (Continued on Page Three)

MUSICAL CLUBS CONCERT

Program To Be Given At Franklin Square House.

The combined Musical Clubs '14 will give their first concert of the year at the Franklin Square House tomorrow night at 8.15 o'clock. The program is a good one and will consist of the following selections: Skipper Susie Green, Sere, and Jubilee Rag by the Mandolin Club; Popular Medley and Dat Yam Rag, by the Banjo Club; Winter Song, The Cat With A Cl-..."

E. E. SOCIETY MEETING

Mr. Morse To Speak—Trip To Simplicity Co. Plant.

The next meeting of the Electrical Engineering Society will be held in the Union at 8.00 o'clock on November 15th. Mr. Henry A. Morse of the Simplicity Wire and Cable Co. will speak on the subject, "The Manufacture of Rubber Insulated Wires and Cables." Mr. Morse is vice-president of the company and is a speaker of ability. The lecture will be well illustrated with lantern slides. A trip to the Simplicity Co.'s plant will be arranged to come shortly after November 15th. This will give the men a chance to actually see the operations described in Mr. Morse's lecture.

WIRELESS SOCIETY

The second meeting of the year of the Wireless Society will be held Thursday in Room 11, Eng. B, at 4.30 o'clock. Mr. H. G. Powers, who is erecting the new aerial at Tufts College, will speak.

BROWN OF TECHNOLOGY CROSS COUNTRY WINNER

Institute Team Gets Third In New England Meet—Maine Is The Winner.

Although Captain R. G. Brown of Technology was the first to cross the tape in the fourth annual New England Intercollegiate Cross Country run last Saturday at Franklin Park, his team mates were not able to fin-
