Subscriptions within the Boston Postal District, and outside of the United States may be postaged at the rate of one cent a copy.

WEDNESDAY, DECEMBER 3, 1915

OPEN AIR OFFICES.
So inspiring is the spectacle of the New Technology that it is somewhat difficult, while contemplating how wonderful conditions across the River will be, to come to earth long enough to consider what is to become of Institute activities next year. It is certain that the present offices will be finished in this term by students of the Massachusetts Institute of Technology. This is the second successive year that the Musical Clubs Association will be followed by a dance. It is expected that the skit of the Glee Club will make its initial appearance in this concert. All men who are going on the trip should report to Manager Mendelsohn any Monday, Wednesday or Friday afternoon between 5:15 and 6:00 o'clock, at the Gym.

GYM COMPETITION
Freshman candidates for second assistant manager of the gym team should report to Manager Mendelsohn any Monday, Wednesday or Friday afternoon between 5:15 and 6:00 o'clock, at the Gym.

ORCHESTRA REHEARSAL
With twenty-six members present, the most successful rehearsal which the orchestra has yet held, took place Wednesday afternoon. Under Mr. Howard's direction a thorough drill was given, demonstrating the principles which underlie good team work in an orchestra. It is hoped that all those candidates who intend to try out for the violin or the cello will come out before next Wednesday to get the benefit of Mr. Howard's weekly instruction.

M. I. T. FORUM
Through the combined efforts of the M. I. T. Forum and the T. C. A., the first of a series of talks on aspects of militarism will take place in Room 8 Eng. C at 3:30 o'clock today. The meeting will be in charge of Mr. Cushman; the subject for discussion will be "Propaganda."

SENIOR DINNER
(Continued from Page One)

Burrus Ford, the second speaker, touched briefly on the bright futures ahead of the members of 1916. Professor Miller, Course II, then gave an interesting series of statistics with which he said every graduate should be familiar. His remarks concerning the new laboratories were of especial interest. Professor Spofford, Course I, followed Prof. Miller with an enumeration of the characteristics necessarily inherent in a successful engineer or business man. As a surprise to most of those present, Governor Walsh was announced. The Governor made only a few brief remarks on the great value and influence of the Institute throughout the entire country. He said that this influence should make Technology an exception to his policy of not appropriating money to institutions of higher education.
